Disclaimer

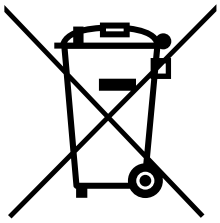

The information in this document is subject to change without prior notice in order to improve reliability, design, and function and does not represent a commitment on the part of the manufacturer. In no event will the manufacturer be liable for direct, indirect, special, incidental, or consequential damages arising out of the use or inability to use the product or documentation, even if advised of the possibility of such damages.

Environmental Responsibility

ADLINK is committed to fulfill its social responsibility to global environmental preservation through compliance with the European Union's Restriction of Hazardous Substances (RoHS) directive and Waste Electrical and Electronic Equipment (WEEE) directive. Environmental protection is a top priority for ADLINK. We have enforced measures to ensure that our products, manufacturing processes, components, and raw materials have as little impact on the environment as possible. When products are at their end of life, our customers are encouraged to dispose of them in accordance with the product disposal and/or recovery programs prescribed by their nation or company.

Battery Labels (for products with battery)

California Proposition 65 Warning

WARNING: This product can expose you to chemicals including acrylamide, arsenic, benzene, cadmium, Tris(1,3-dichloro-2-propyl)phosphate (TDCPP), 1,4-Dioxane, formaldehyde, lead, DEHP, styrene, DINP, BBP, PVC, and vinyl materials, which are known to the State of California to cause cancer, and acrylamide, benzene, cadmium, lead, mercury, phthalates, toluene, DEHP, DIDP, DnHP, DBP, BBP, PVC, and vinyl materials, which are known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

Trademarks

Product names mentioned herein are used for identification purposes only and may be trademarks and/or registered trademarks of their respective companies.

Conventions

Take note of the following conventions used throughout this manual to make sure that users perform certain tasks and instructions properly.

NOTE:

Additional information, aids, and tips that help users perform tasks.

CAUTION:

Information to prevent ***minor*** physical injury, component damage, data loss, and/or program corruption when trying to complete a task.

ATTENTION: Informations destinées à prévenir les blessures corporelles mineures, les dommages aux composants, la perte de données et/ou la corruption de programme lors de l'exécu- tion d'une tâche.

WARNING:

Information to prevent ***serious*** physical injury, component damage, data loss, and/or program corruption when trying to complete a specific task.

AVERTISSEMENT: Informations destinées à prévenir les bles- sures corporelles graves, les dommages aux composants, la perte de données et/ou la corruption de programme lors de l'exécution d'une tâche spécifique.

1 Introduction

1.1 Overview

This user manual provides an overview on the AVA-1000. This user guide focuses on describing the special features of the AVA-1000 series variants (AVA-1000/x7433RE/8G/64G & AVA-1000/iMX8MP/8G/64G) and provides information on assembly, installation, operation, and maintenance on AVA-1000 to make the best use of the product. It is recommended to read the instructions in this user manual before using the product.

AVA-1000 is a compact fanless system targeting for Train-to-Ground, (T2G) communication, serving as an onboard gateway in the railway application. The CPU option includes Intel Amston Lake Atom series based on x86 architecture and NXP i.MX8M Plus based on ARM structure.

AVA-1000 is a fan-less communication gateway supporting on board GNSS, up to two 5G modem M.2-3042/3052 B-key slots and one M.2-2230 E-key slot for Wi-Fi and Bluetooth modules. Each modem slot supports 2 nano SIM cards. AVA-1000 is equipped by default with QMA antenna connectors for connectivity according to the configuration. The installation of the modems and modules can be completed by opening the lid after loosening the thumb screws on the panel.

For storage, the OS can be integrated into the eMMC on the SMARC module in AVA-1000. In addition, AVA-1000 provides an M.2-2230 M-key slot as another storage option.

1.2 Features

- EN 50155:2021 certified
- Fan-less and compact design
- Computing Processor:
  - Intel Atom x7433RE Quad-Core 1.5 GHz, 9W TDP, LPDDR5 8GB soldered
  - NXP i.MX8M Plus with Quad core ARM Cortex-A53, LPDDR4L 8GB soldered
  - Other CPU and DDR options upon request
- Front panel interfaces
  - 1x M12 K-coded male power connector with ignition
  - 3x 2.5G M12 X-coded female Ethernet ports
  - 1x 2x6 terminal block connector supporting RS-232/422/485, 4x DI/4x DO, and other optional interfaces.
  - Contact ADLINK for additional interfaces if needed
- Side panel interfaces for maintenance
  - 1x Reset button
  - 1x HDMI 1.4
  - 1x USB 3.1 Gen1 5G Type A
- Special ports for ARM based AVA-1000
  - 1x Micro SD for quickly flash image to eMMC
  - 1x Console port for system debug
  - 1x Micro-B support OTG mode and NXP serial download mode
  - 1x Dip switch for boot mode selection
- Open lid for internal modules installation and removal
  - 2x M.2-3042/4052 B Key slots for 5G/LTE modem installation
  - 1x M.2-2230 E Key slot for Wi-Fi/BT or other expansion
  - 1x M.2-2242 M Key slot for NVME storage
  - 1x onboard u-blox Neo-M9N GNSS module
- Rear side antenna
  - 11pcs QMA connectors for x86 based and 7pcs for ARM based

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

1.3 Packing List

Please check that your package contains the items listed below. If you discover any damaged or missing items, please contact your ADLINK representative for assistance.

- AVA-1000 hardware configured as ordered
- AVA-1000 mating power cable with terminal block (PN: 30-22184-0000-A0)
- AVA-1000 wall mount kit
- Terminal block for DI/DO and COM (PN: 20-C2041-2060)
- AVA-1000 Wi-Fi AX210 Thermal Part (PN: 58-10643-200E)
- AVA-1000 FN990 Bottom PAD Thermal Part (PN: 58-10643-300E)
- Technical service card

For modem and modules not supported in the list, please notify ADLINK representatives for thermal solution.

DO NOT install or apply power to equipment that is damaged or if there is missing/incomplete equipment. Retain the shipping carton and packing materials for inspection. Please contact your ADLINK dealer/vendor immediately for assistance. Obtain authorization from your dealer before returning any product to ADLINK.

1.4 Optional Accessories

The AVA-1000 is shipped without add-on modules. The approved modules is listed as below:

- AVA-1000 24VDC IN AC-DC PSU (PN: 91-95376-000E)
- 5G modem FN990A40-HP (PN: 29-D0990-E000)
- Intel AX210 Wi-Fi module (PN: 29-E0210-2010)
- ADLINK NVME series. Please contact ADLINK representative for selection

4 Getting Started

Follow the instructions describing the installation of SIM cards, Wi-Fi, cellular and M.2 NVMe modules; ground cable; and DC power supply.

NOTE:

MXM and CAN bus modules must be installed at the factory. Please contact your local ADLINK representative for more information.

4.1 Removing the Movable Cover

To install the optional modules, first remove the movable cover as illustrated below:

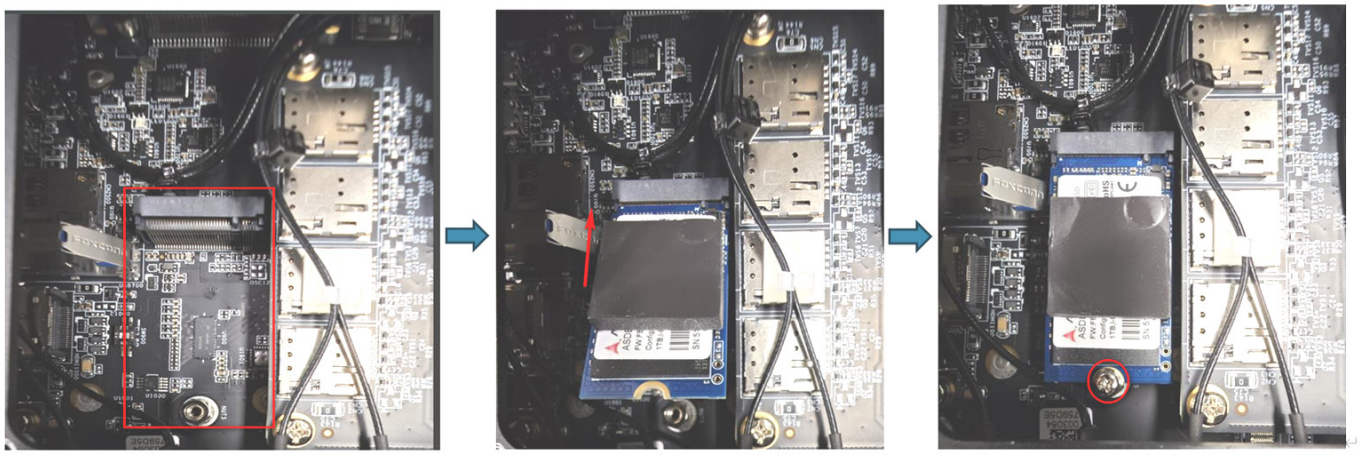

1. Place the box PC on a suitable surface with the top side facing up. Remove the 2 thumb screws from the top-right side as indicated below.
2. Lift the rear cover off of the box PC chassis.

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

4.2 Installing the M.2 M-Key 2242 NVMe Storage Module

To install the M.2 M-Key 2242 NVMe module, insert the module into the slot and attach the thermal pad, securing it with M2.5 screws, as shown below.

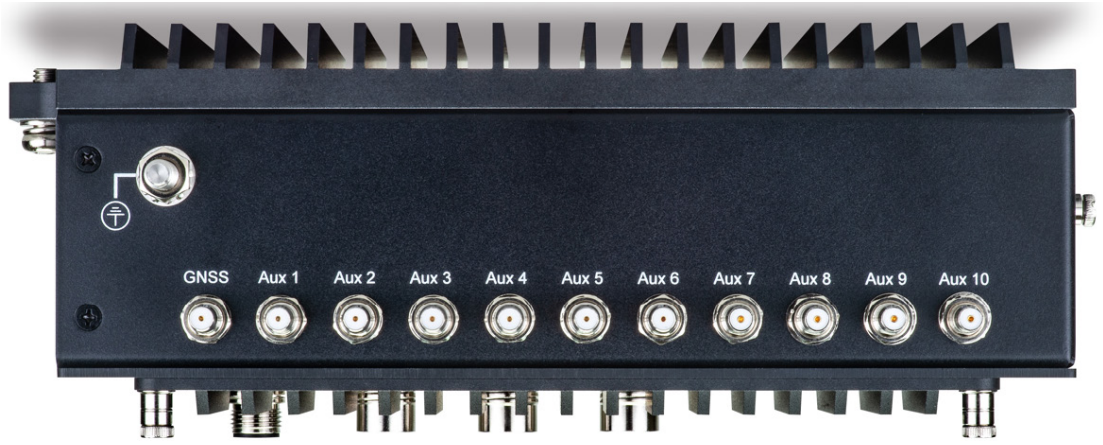

NOTE:

M.2 modules require an additional thermal solution when operated above 60°C. Please contact your local ADLINK representative for more information.

Secure the NVME module: Insert the NVME module into the corresponding slot and fasten it with screws.

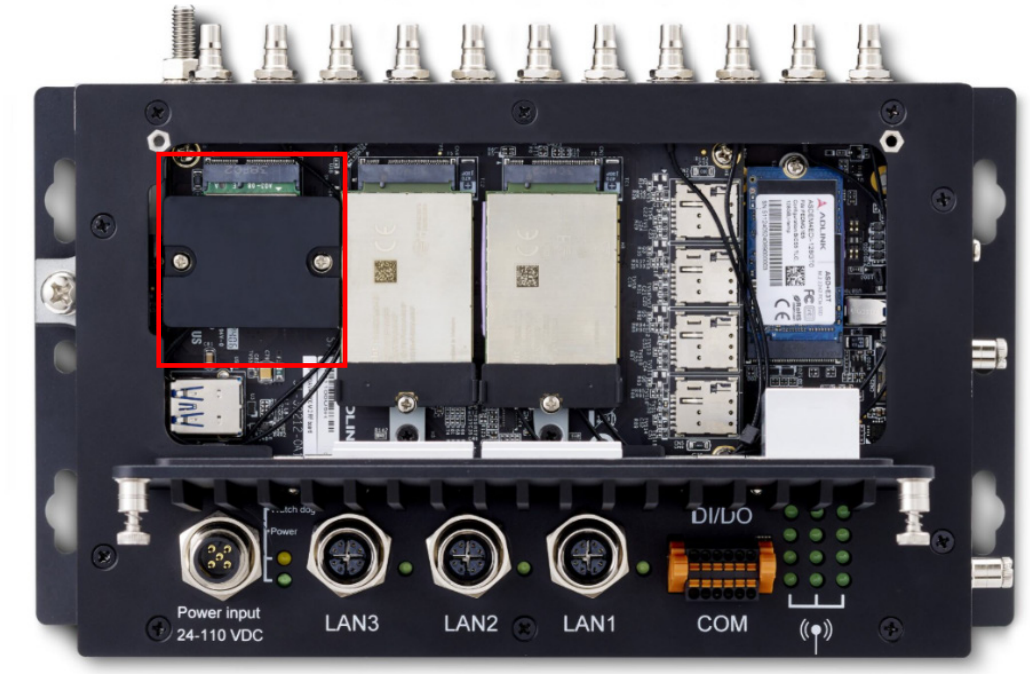

4.3 Installing M.2 2230 E-Key Wi-Fi/BT Modules

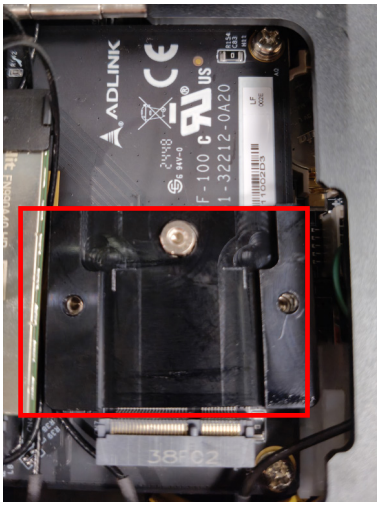

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

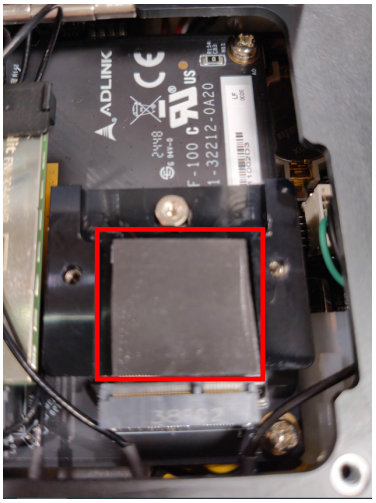

The GNSS QMA antenna is preassembled during the production stage.

The Aux1 and Aux 2 are assigned for Wi-Fi modules. The Wi-Fi module should be placed at the location marked as below.

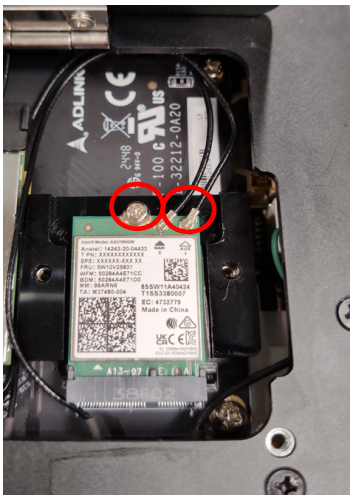

1. To install the Wi-Fi/BT module, Find the heat spreader and placed on the location for Wifi M.2. Place the thermal pad at the location marked as below.

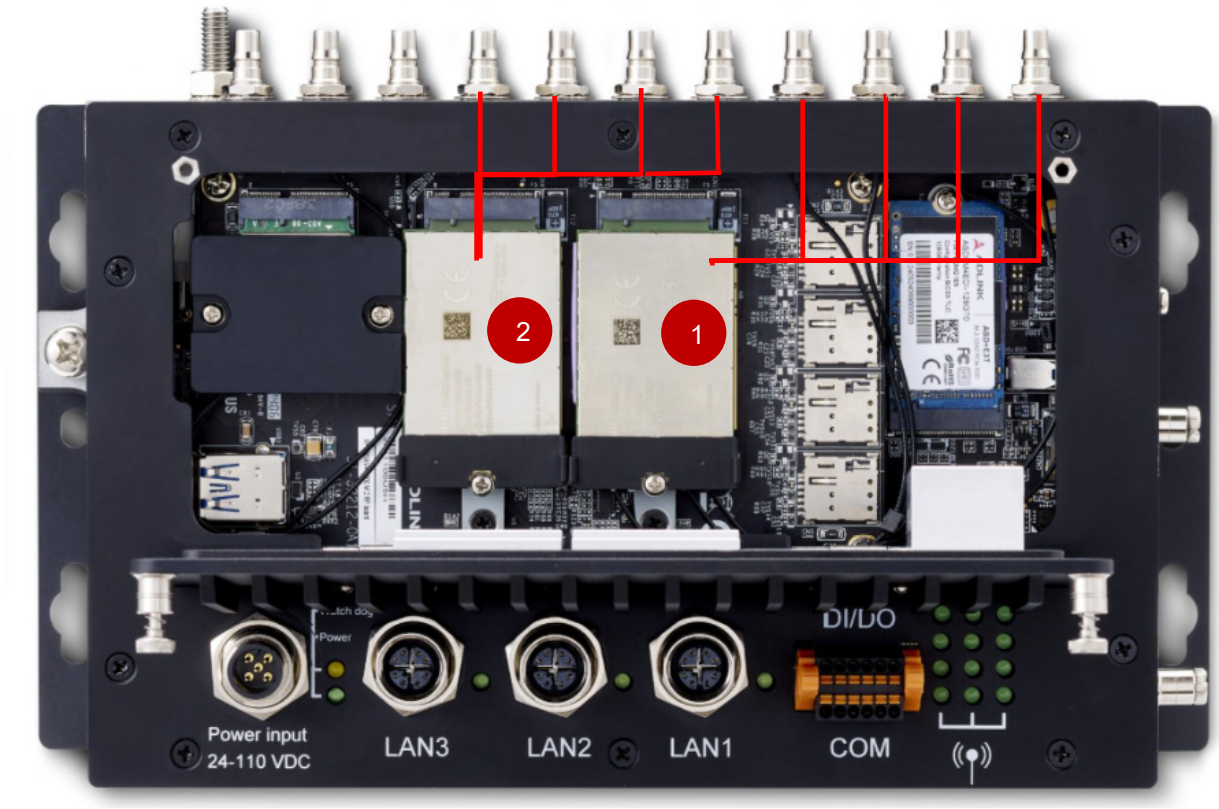

2. Attach the AUX1 and AUX2 QMA to I-PEX4 connector to the Wi-Fi module and fasten the screw. Organize the cable prevent it from being overlap on the thermal solution. Cover the heat spreader and fasten two screws.

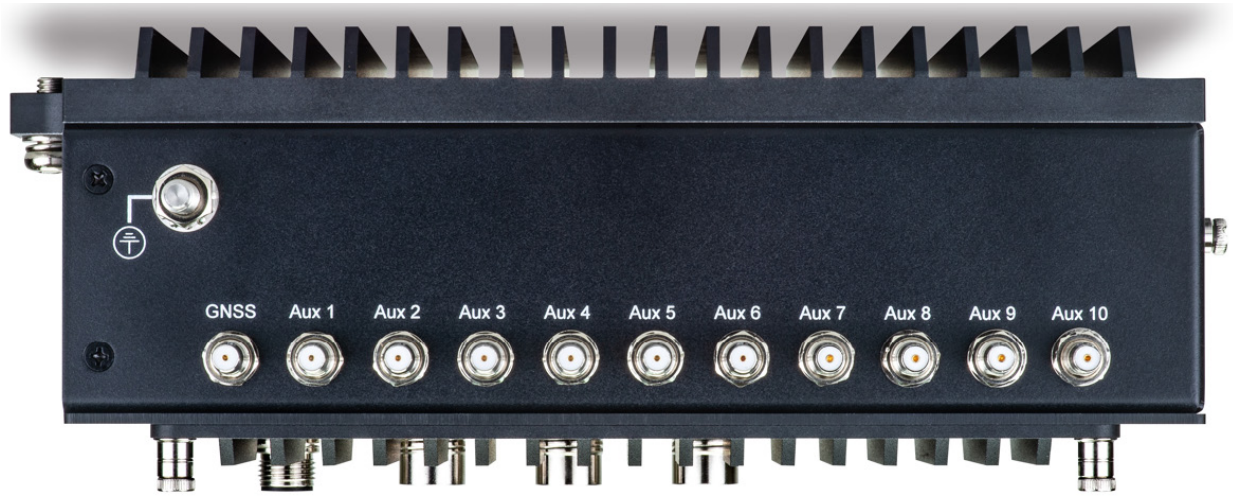

4.4 Installing M.2 B-Key 3042/52 5G Modules

There are two M.2 B Key 3042/3052 5G module slots. Slot 1 is supported for both x86 and ARM version. Slot 2 is supported only for AVA-1000 based on x86 architecture. Slot 1 a is connected to AUX7, AUX8, AUX9, AUX10. Slot 2 is connected to AUX3, AUX4, AUX5, AUX6.

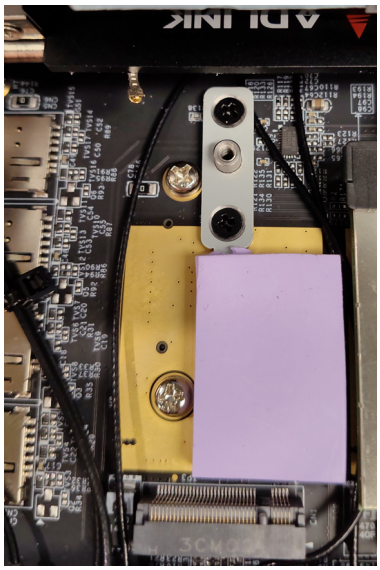

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

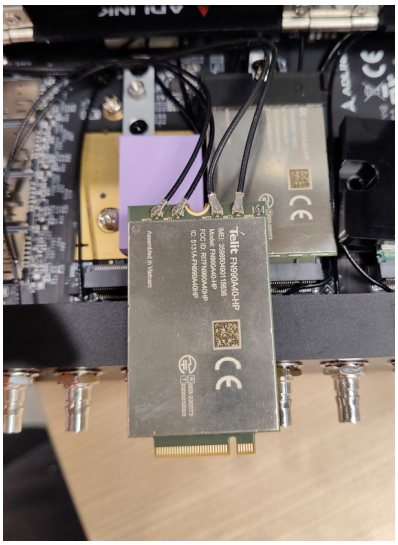

The 5G modem assembly is the same for both slot 1 and slot 2.

1. Step 1: Find the thermal pad for 5G modem FN990 and place it at the PCB with gold plate.

2. Step 2: Attach the QMA to IPEX1 cables at the location assigned on the modem according to the silkscreen on the PCBA of the modem.

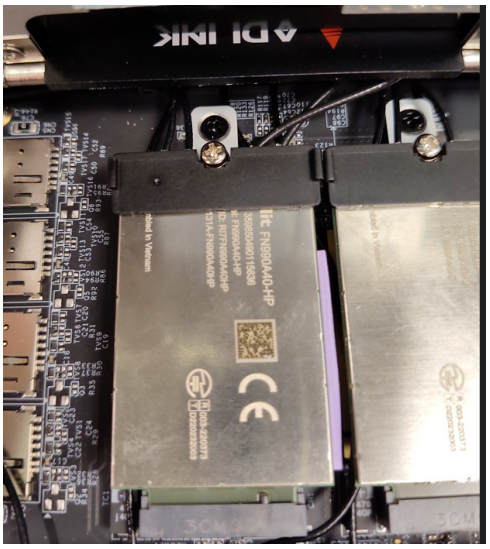

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

3. Attach the IPEX bracket onto the modem. The bracket is to prevent the IPEX connector from falling off. Sliding from the end of the modem is recommended. Pay attention to the cable from interfere the bracket.

4. Fasten the 5G modem screws. Organize the cable to the edge of the chassis. It is to prevent the cables from overlapping on the thermal pad.

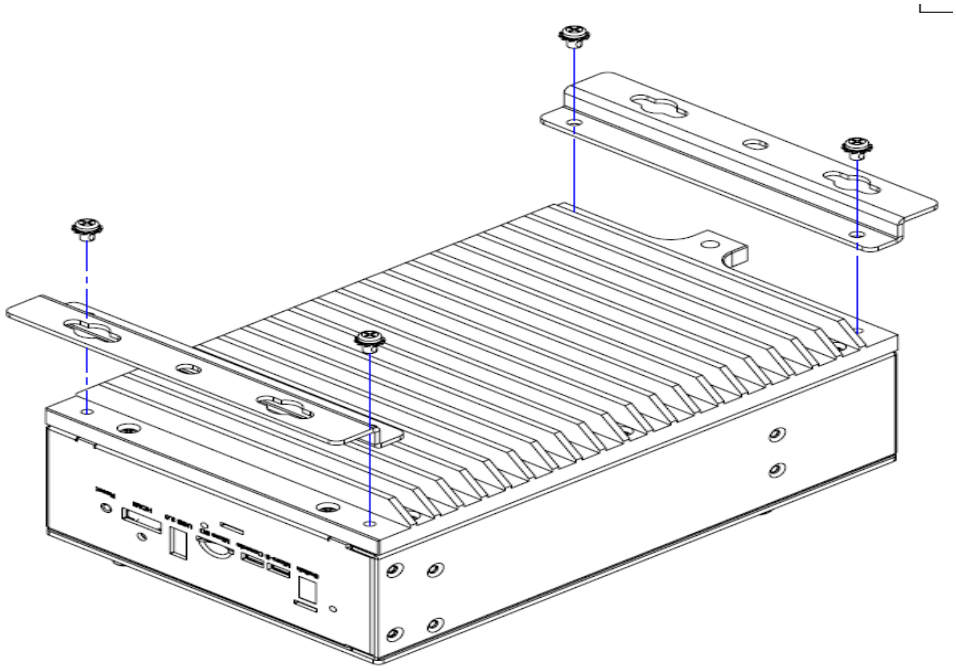

Step 5: Close the cover. The thermal pad on the cover will help dissipate the heat to the housing.

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

4.5 Wall Mounting

The AVA-1000 can be wall or surface mounted using the wall mount brackets and screws provided. If wall mounting, make sure the wall can support the weight of the device. Secure the brackets to the chassis using the 4 screws provided.

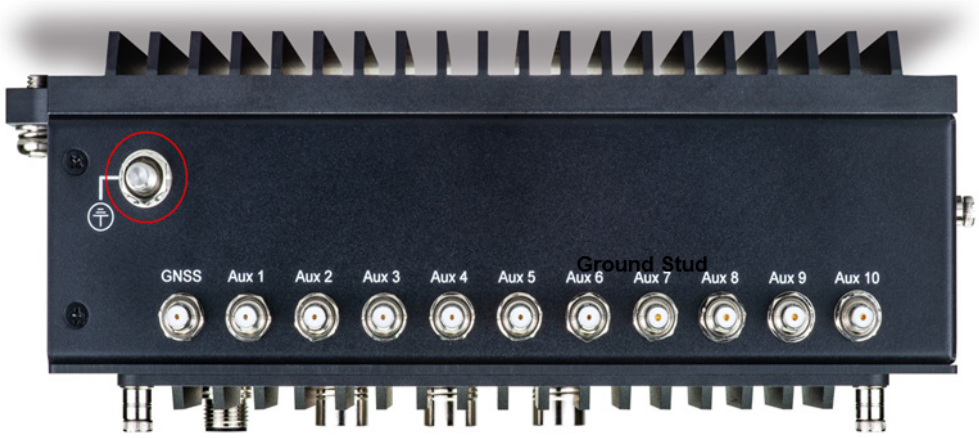

4.6 Connecting a Ground Cable

CAUTION:

Connect the ground cable before making any other connections. When disassembling the system, always detach the ground cable last.

- Use a ground cable with a cross section of at least 0.823mm2 (18AWG) and an M5 size ring terminal.
- Slide the ring terminal onto the ground stud and secure it with the locking M5 nut.

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

4.7 Connecting the Power Supply

CAUTION:

Connect the ground cable before making any other connections. When disassembling the system, always detach the ground cable last.

WARNING:

- Work on the computer system may only be carried out by personnel qualified for the specific task and who have the training and experience to identify risks and avoid potential hazards.
- Make sure that a ground cable has been connected to the system before connecting an external power supply and switching on the system.
- Make sure that the voltage supplied by the external power supply conforms to specifications of the system.

Connect the power supply to the 4-pin M12 A-coded connector on the front of the chassis. The device will power up when the power supply is turned on.

NOTE:

The user must provide the +24 to 110VDC

4.8 Starting the System

Upon starting up, the system will auto-detect storage devices and boot from the operating system, if found. To change the boot device order, press <Del> or <Esc> to enter BIOS setup menu and change the Boot Option settings. If no operating system is found, the system will enter the BIOS setup menu automatically.

The AVA-1000 is delivered without an operating system installed.

5.3 Buttons and LEDs

5.3.1 Power Button

The power button is non-latching, the system turns on when the button is pressed, then the power LED illuminates. If the system hangs, pressing the button will completely shut it down.

System status	Power LED (GREEN)
Power On	On
Power Off	Off

5.3.2 Reset Button

The reset button is non-latching. The system is restarts when the button is pressed. If the system hangs, press the button to restart it.

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.3.3 Status LEDs

LED indicator	Color	Description
Power	Green	1 x power on and reset LED (Green), LED on when power on. LED off when power off.
Watchdog	Yellow	1 x WDT LED (Yellow) , Indicates watchdog timer status. When the watchdog timer starts, the LED flashes. When the timer is expired, the system will auto reboot.
Lan	Green	1 x 1G Ethernet (signal from USB) (Green) 2 x 1G Ethernet (signal from SMARC) (Green)
Wi-Fi	Green	4 x Wi-Fi LED (Green)
Customer indicator LEDs	Green	8 x customer indicator LEDs (2x 4 Green)

6 System Interfaces

6.1 Installing Operating System

6.1.1 Install Ubuntu 22.04.4 LTS (Kernel Linux adlink-ava-1v3 6.5.0-25-generic) X86

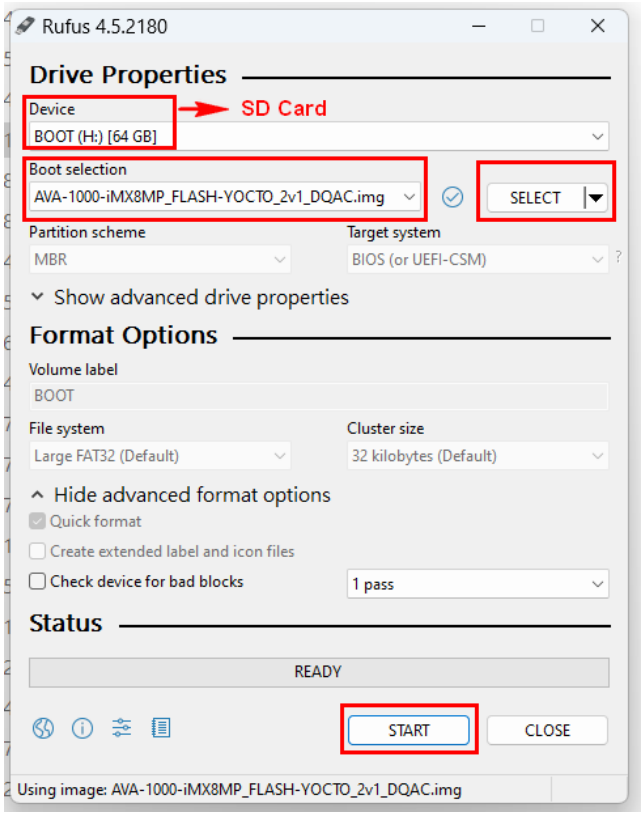

Use Rufus tool recovery **AVA-1000_Ubuntu_22.04.4_x64_IMG_1v3.iso image**

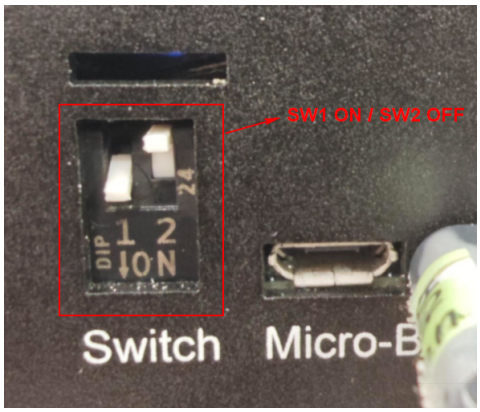

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

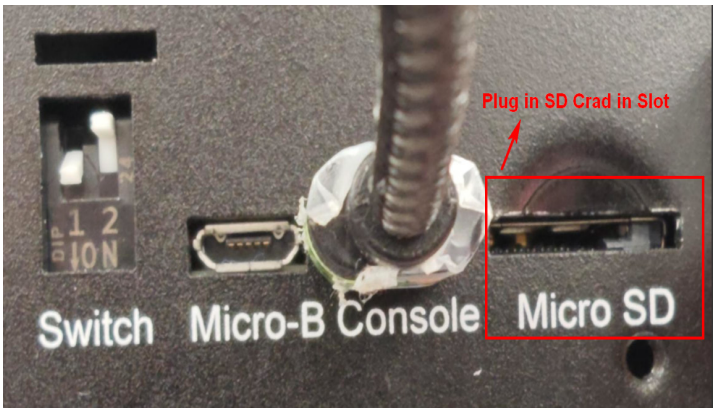

6.2 Install AVA-1000-iMX8MP_factory_yocto_2v1 ARM (Recovery image for SD Card to EMMC)

1. Download the **AVA-1000-iMX8MP_factory_yocto_2v1 image** and unzip it with 7-zip.
2. Please use Rufus tool to recover the **AVA-1000-iMX8MP_factory_yocto_2v1 image** to an SD Card (**SD card must be more than 16G**).

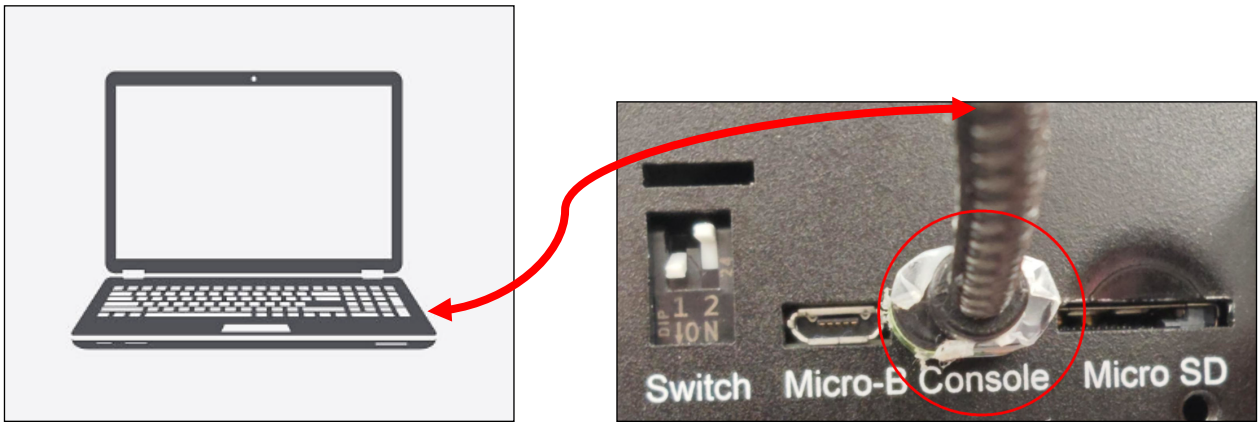

3. Set **jump Switch SW1 to ON / SW2 to OFF** for SD card image recovery to EMMC, and plug in the SD card slot.

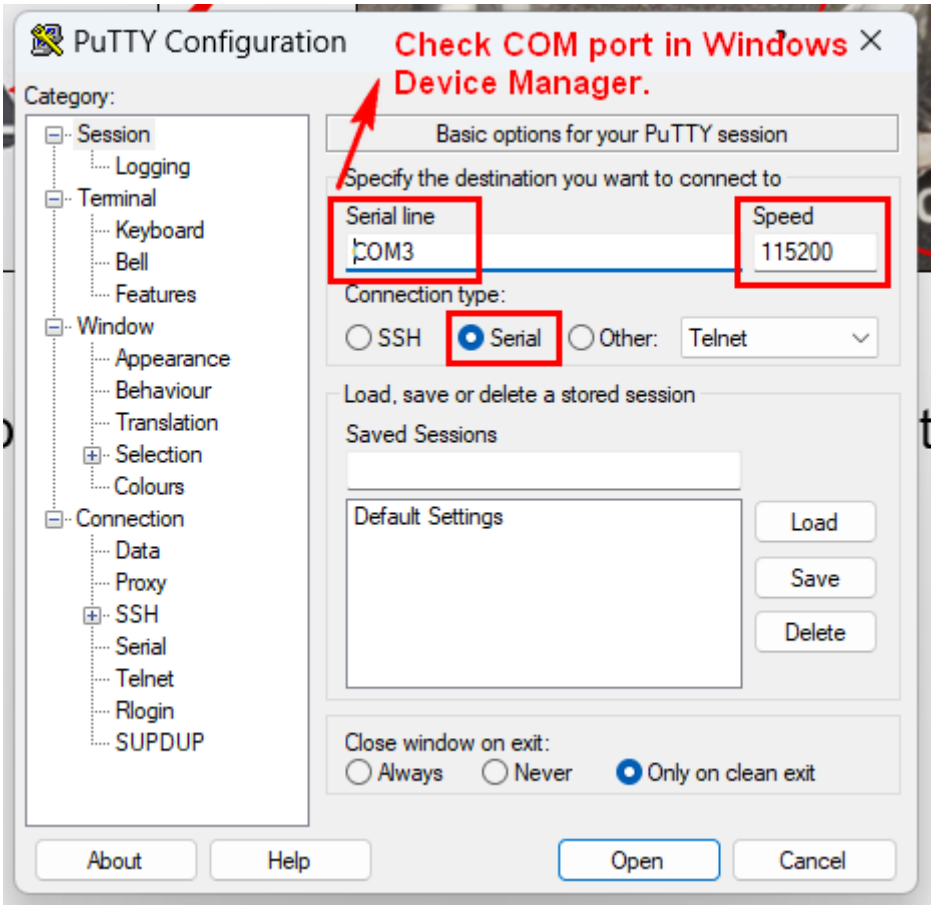

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

4. Use a Micro USB to USB Type-A cable to connect the Console slot to the Host PC (Window 10).

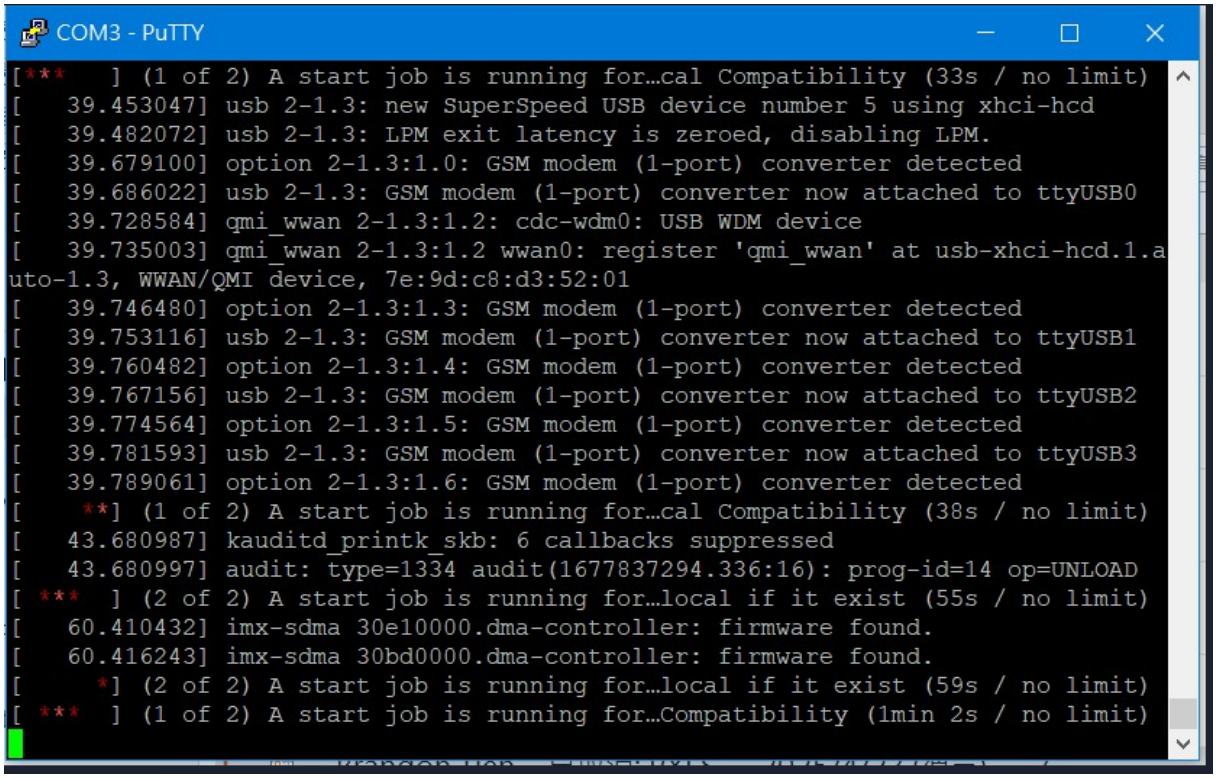

5. Check the COM port in Windows Device Manager. Open PuTTY, Select connection type:Serial, and set COM port and speed (115200).

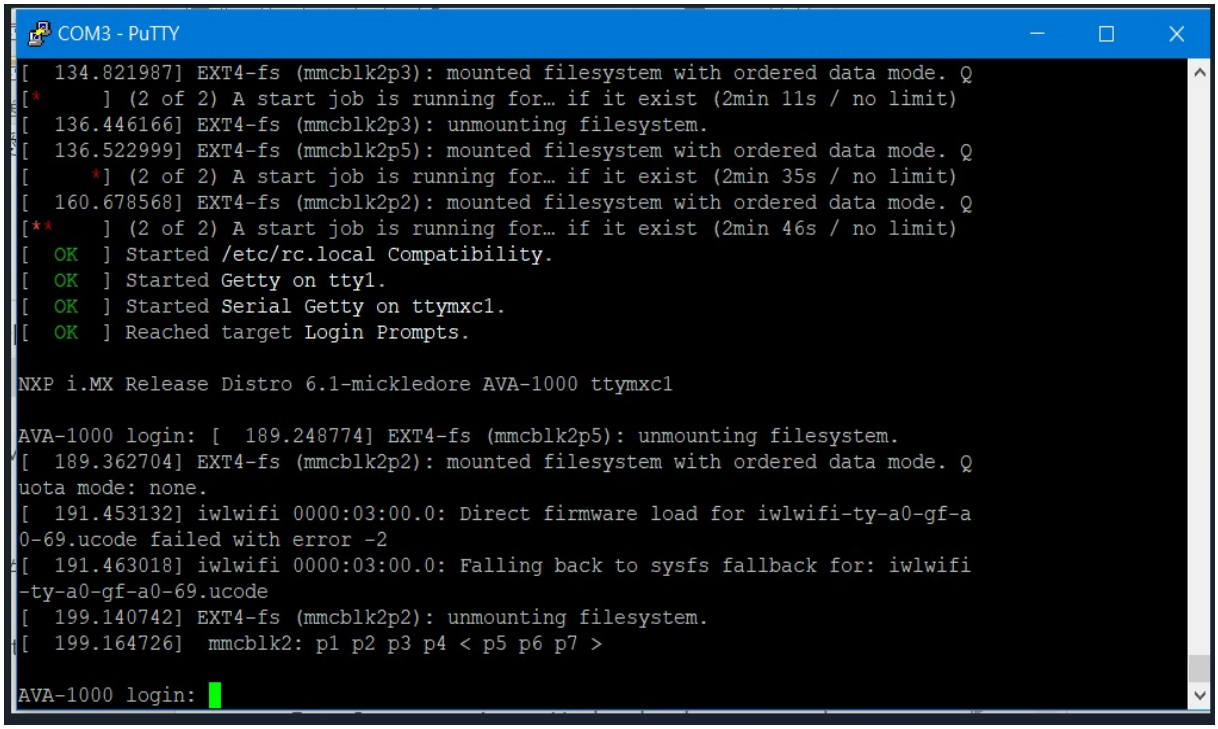

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

6. Once the AVA-1000 is powered ON, PuTTY will show the SD card image being restored to eMMC.

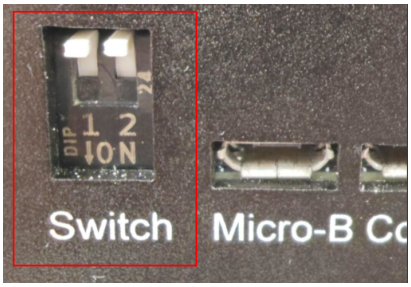

SD card image successfully restored to eMMC.

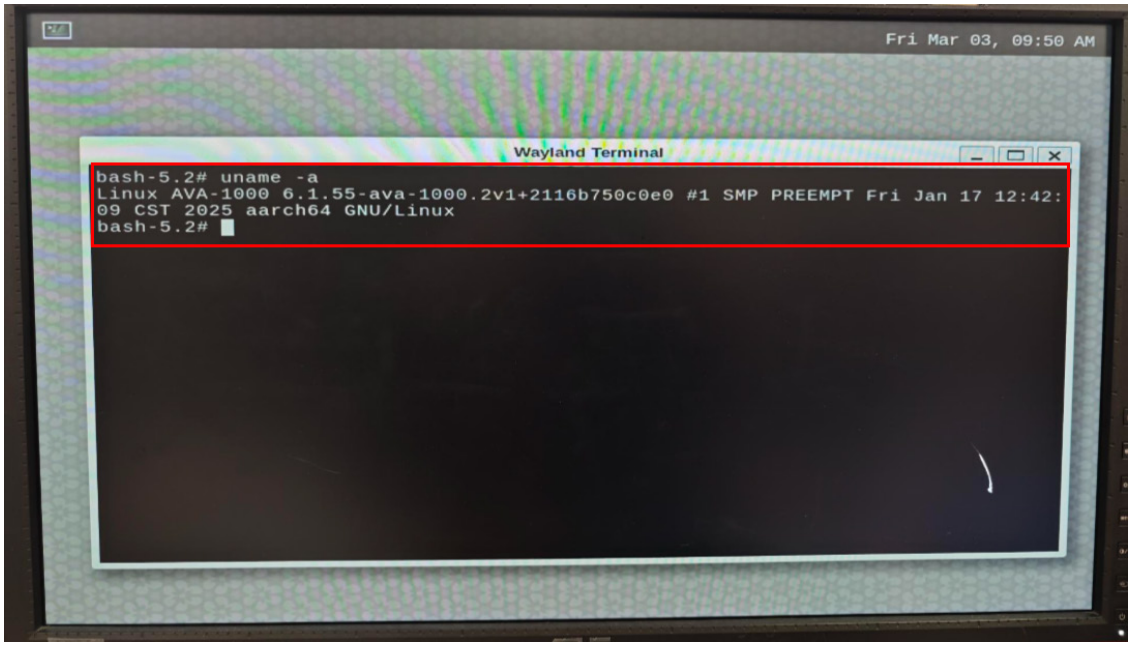

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

7. Set jump **Set SW1 to OFF / SW2 to OFF**. Remove the SD card and Micro USB cable, then connect the HDMI cable and boot from eMMC.

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

6.3 DIO Test

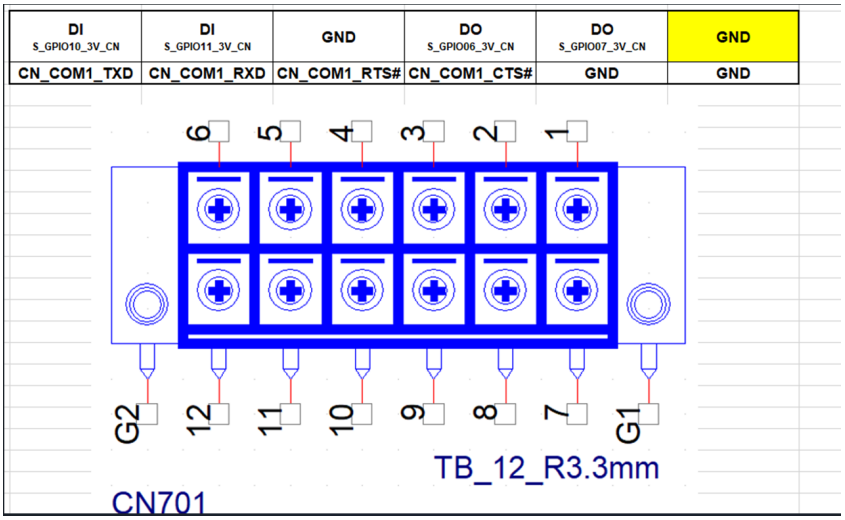

6.3.1 Ubuntu 22.04.4 LTS (Kernel Linux adlink-ava-1v3 6.5.0-25-generic) X86 GPIO Test

- Platform: AVA-1000
- OS: Ubuntu 22.04.4 LTS (Kernel Linux adlink-ava-1v3 6.5.0-25-generic)

 # The gpio chip have GPIOs include 12 pins, use the GPIO loopback test fixture test

Identify the GPIO number for the DIO pin

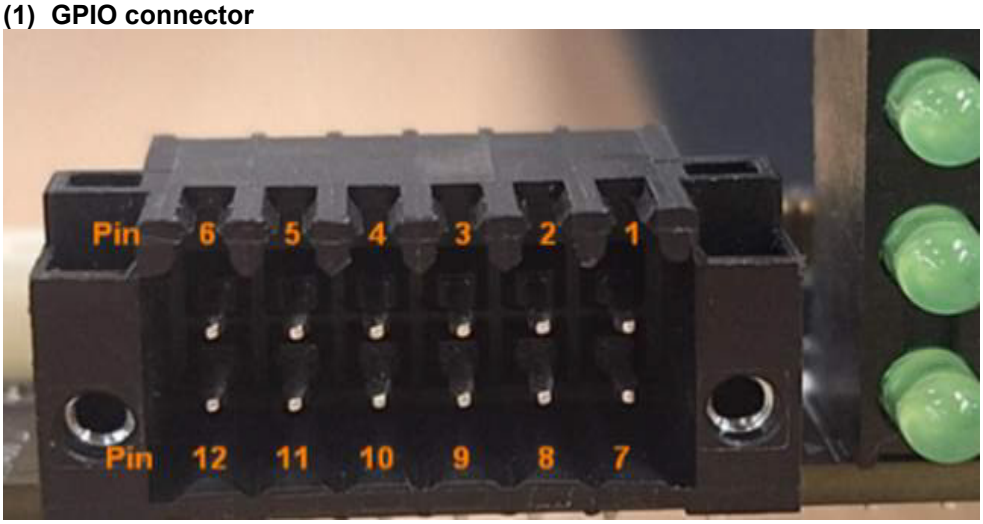

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

 # Check GPIO function number in the platform schematic

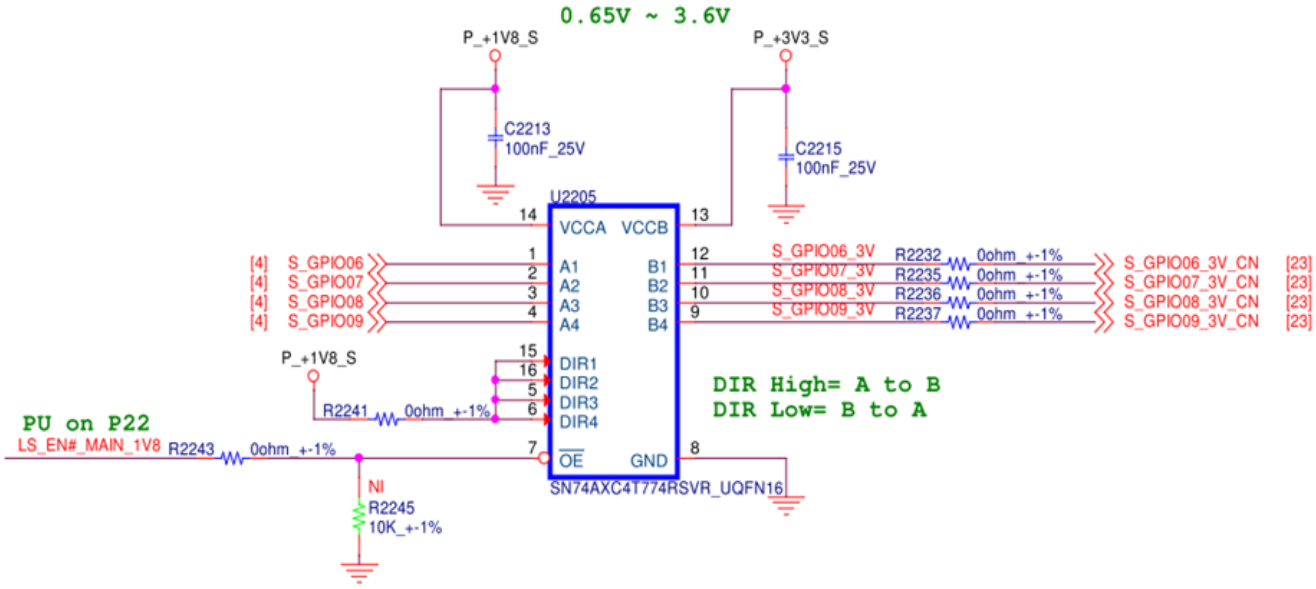

Refer the platform schematic, there are 2 * DI(O2_GPIO_11/ O2_GPIO_10) and 2 * DO(O2_GPIO_7/ O2_GPIO_6).

SMARC module: LEC-ASL	SMARC connector pin	Carrier board	AVA-1000 GPIO connector pin	Remark
O2_GPIO_7	P115	S_GPIO07_3V_CN	2	DO
O2_GPIO_6_TACHIN (O2_GPIO_6)	P114	S_GPIO06_3V_CN	3	DO
O2_GPIO_11	P119	S_GPIO11_3V_CN	5	DI
O2_GPIO_10	P118	S_GPIO10_3V_CN	6	DI

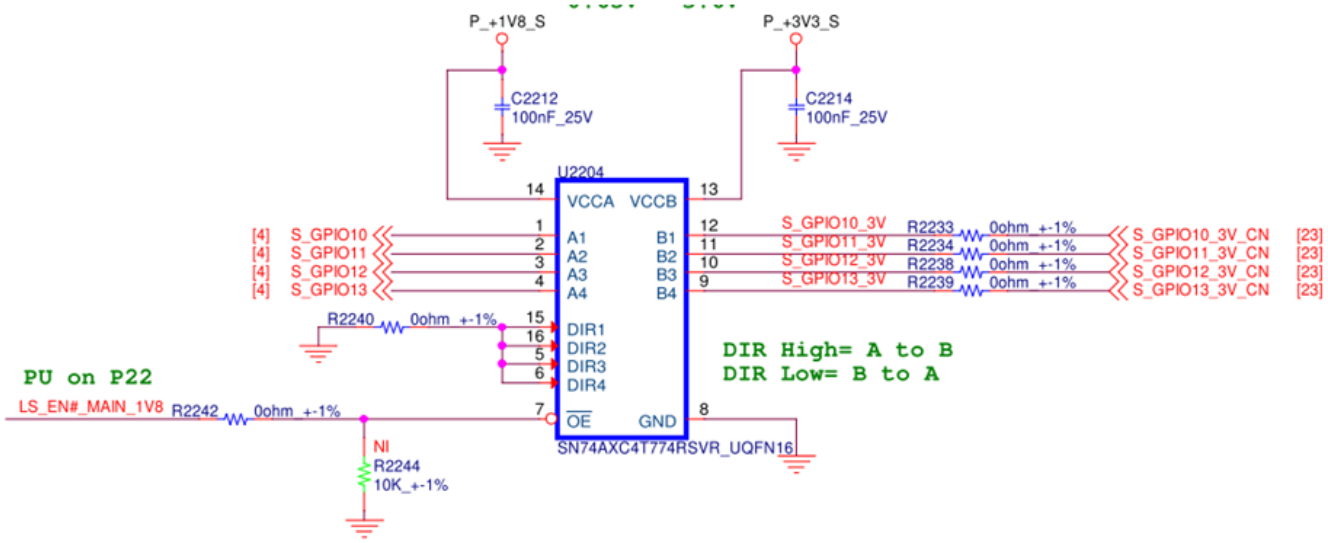

(1) GPIO connector

(2) Carrier board:
Level shift for GPIO

6.3.2 Test GPIO function

Digital Input & Output

DIO function

AVA-1000 platform has 4 DI & 4 DO from SMARC HW pin GPIOs.

 # Digital Input & Output Table

Digital Input	HW Pin	Digital Output	HW Pin
DI1	GPIO6	DO1	GPIO10
DI2	GPIO7	DO2	GPIO11
DI3	GPIO8	DO3	GPIO12
DI4	GPIO9	DO4	GPIO13

DIO control

Using SEMA to control SMARC HW pin.

Config DIO HW pin & set value default low

```
$ sudo semautil /i2c write_raw 2 0x3f 2 0e 3c # 0011 1100
$ sudo semautil /i2c write_raw 2 0x3f 2 0f 31 # 0011 0001
$ sudo semautil /i2c write_raw 2 0x3f 2 10 00 # 0000 0000
$ sudo semautil /i2c write_raw 2 0x3f 2 11 0e # 0000 1110

# Control DO output level
# DO1 high
$ sudo semautil /i2c write_raw 2 0x3f 2 11 7f
# DO2 high
$ sudo semautil /i2c write_raw 2 0x3f 2 11 bf
# DO3 high
$ sudo semautil /i2c write_raw 2 0x3f 2 10 01
# DO4 high
$ sudo semautil /i2c write_raw 2 0x3f 2 10 02
# DOx low
$ sudo semautil /i2c write_raw 2 0x3f 2 10 00
$ sudo semautil /i2c write_raw 2 0x3f 2 11 3f
```

Using SEMA to control SMARC HW pin.

```
# Get DI input level
$ sudo semautil /i2c read_raw 2 0x3f 10 1
```

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

read DI hex value

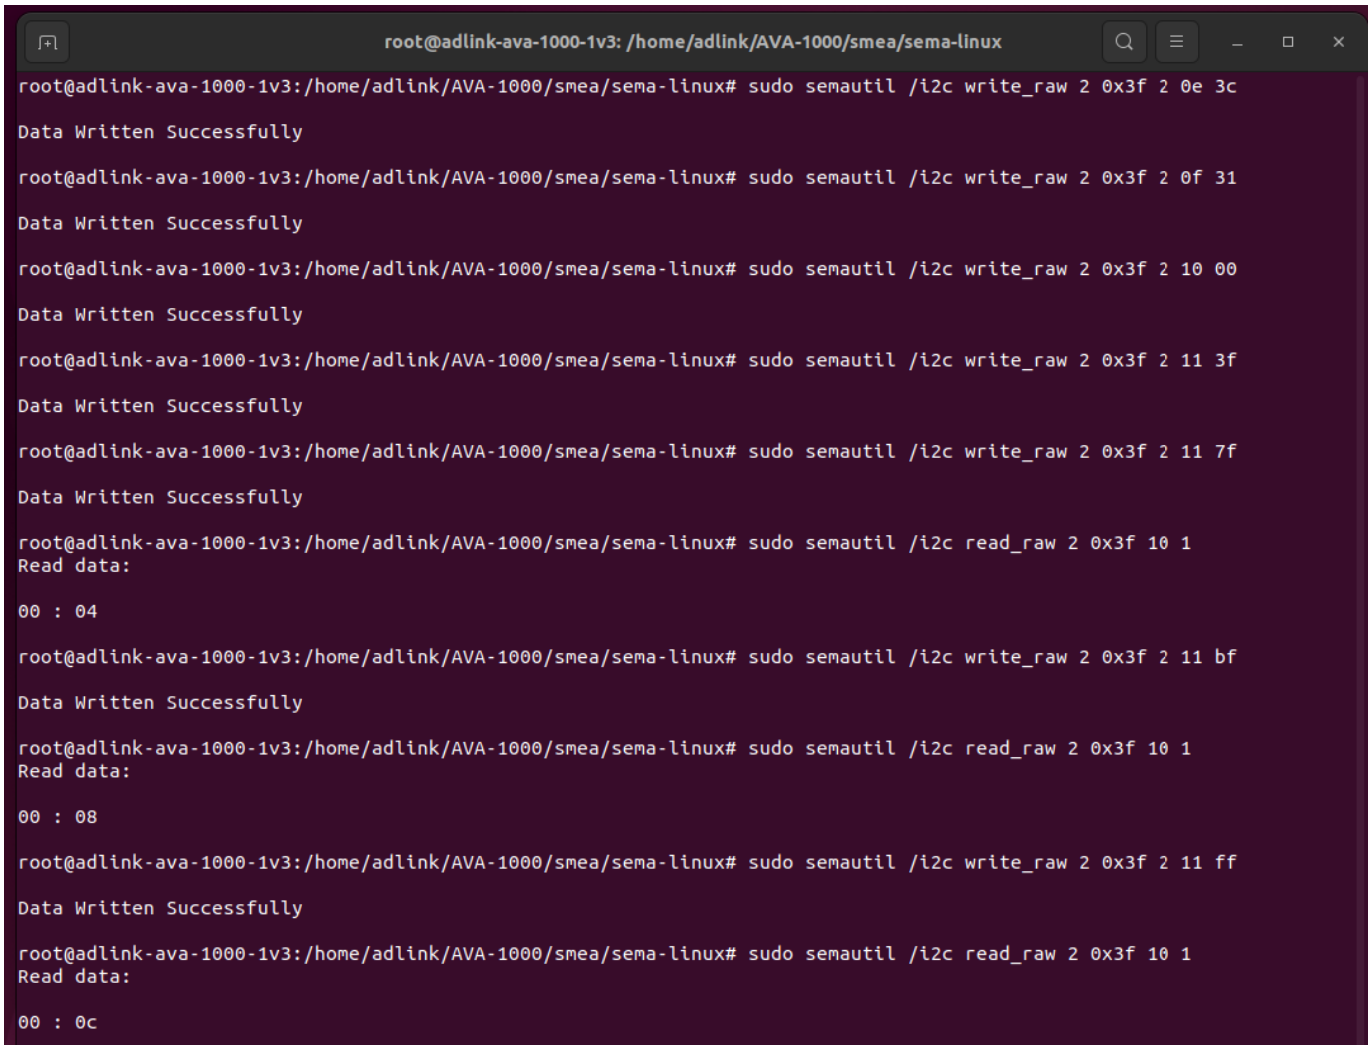

Return value 00 is a hexadecimal value. (0000 0000)

If DI1 is high, the hex value is 04 (0000 0100)

If DI2 is high, the hex value is 08 (0000 1000)

If DI3 is high, the hex value is 10 (0001 0000)

If DI4 is high, the hex value is 20 (0010 0000)

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

6.3.3 Test LED function

LED

LEC control

Using SEMA to control LED HW pin

```
# Config LED HW pin & set LED default off
$ semautil /i2c write_raw 2 0x71 2 0e 00
$ semautil /i2c write_raw 2 0x71 2 0f 00
$ semautil /i2c write_raw 2 0x71 2 10 f0
$ semautil /i2c write_raw 2 0x71 2 11 00
```

Control LED

```
# set LED all on
$ sudo semautil /i2c write_raw 2 0x71 2 10 ff
$ sudo semautil /i2c write_raw 2 0x71 2 11 ff

# set LED column1 on
$ sudo semautil /i2c write_raw 2 0x71 2 10 ff
$ sudo semautil /i2c write_raw 2 0x71 2 11 00

# set LED column2 off
$ sudo semautil /i2c write_raw 2 0x71 2 10 f0
$ sudo semautil /i2c write_raw 2 0x71 2 11 0f

# set LED column3 on
$ sudo semautil /i2c write_raw 2 0x71 2 10 f0
$ sudo semautil /i2c write_raw 2 0x71 2 11 f0

# set LED all off
$ sudo semautil /i2c write_raw 2 0x71 2 10 f0
$ sudo semautil /i2c write_raw 2 0x71 2 11 00
```

6.3.4 AVA-1000-iMX8MP_factory_yocto_2v1 ARM GPIO Test

6.3.4.1 Test GPIO function

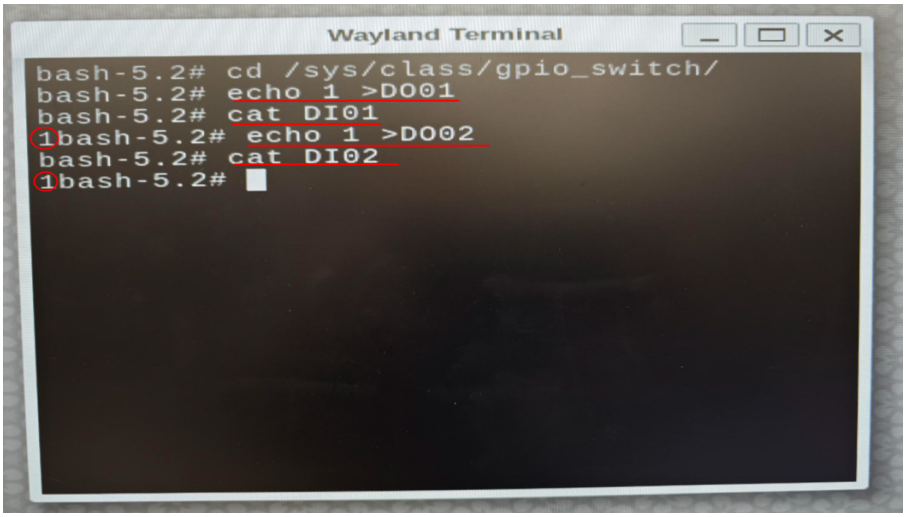

AVA-1000 ARM System, DIO Port plug-in DIO test fixture

Digital Input & Output

connect:

```
GPIO6<->GPIO10
GPIO7<->GPIO11
GPIO8<->GPIO12
GPIO9<->GPIO13
#cd /sys/class/gpio_switch/
#echo 1 > DO01
#echo 1 > DO02
#cat DI01
1
#cat DI02
1
```

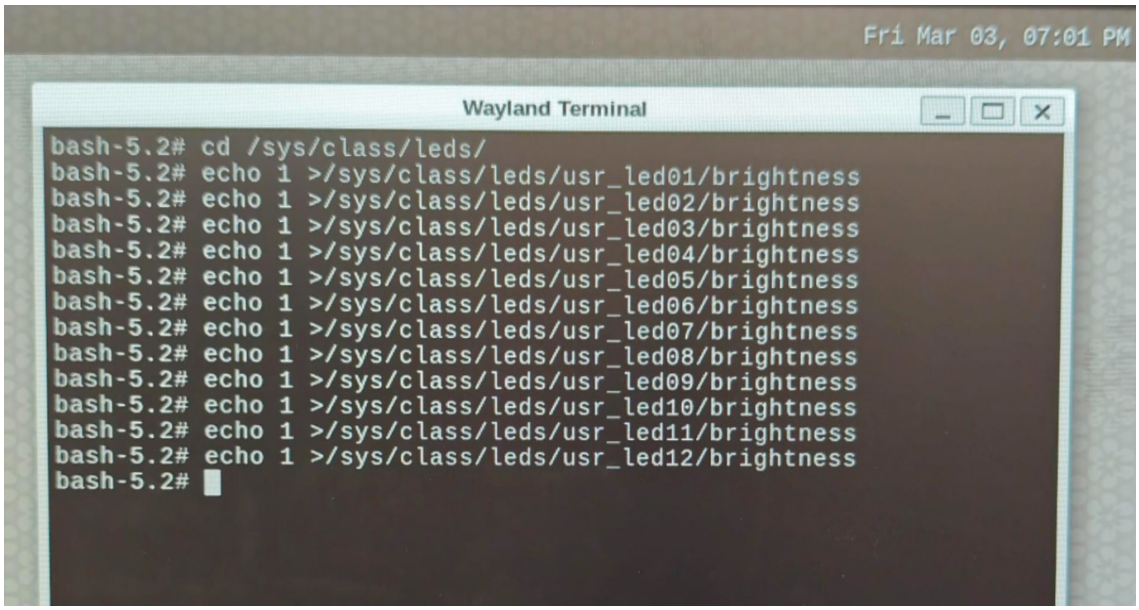

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

6.3.5 Test LED function

LED1~LED12 ON

```
#cd /sys/class/ leds /
# echo 1 > /sys/class/leds/usr_led01/brightness
# echo 1 > /sys/class/leds/usr_led02/brightness
# echo 1 > /sys/class/leds/usr_led03/brightness
# echo 1 > /sys/class/leds/usr_led04/brightness
# echo 1 > /sys/class/leds/usr_led05/brightness
# echo 1 > /sys/class/leds/usr_led06/brightness
# echo 1 > /sys/class/leds/usr_led07/brightness
# echo 1 > /sys/class/leds/usr_led08/brightness
# echo 1 > /sys/class/leds/usr_led9/brightness
# echo 1 > /sys/class/leds/usr_led10/brightness
# echo 1 > /sys/class/leds/usr_led11/brightness
# echo 1 > /sys/class/leds/usr_led12/brightness
```

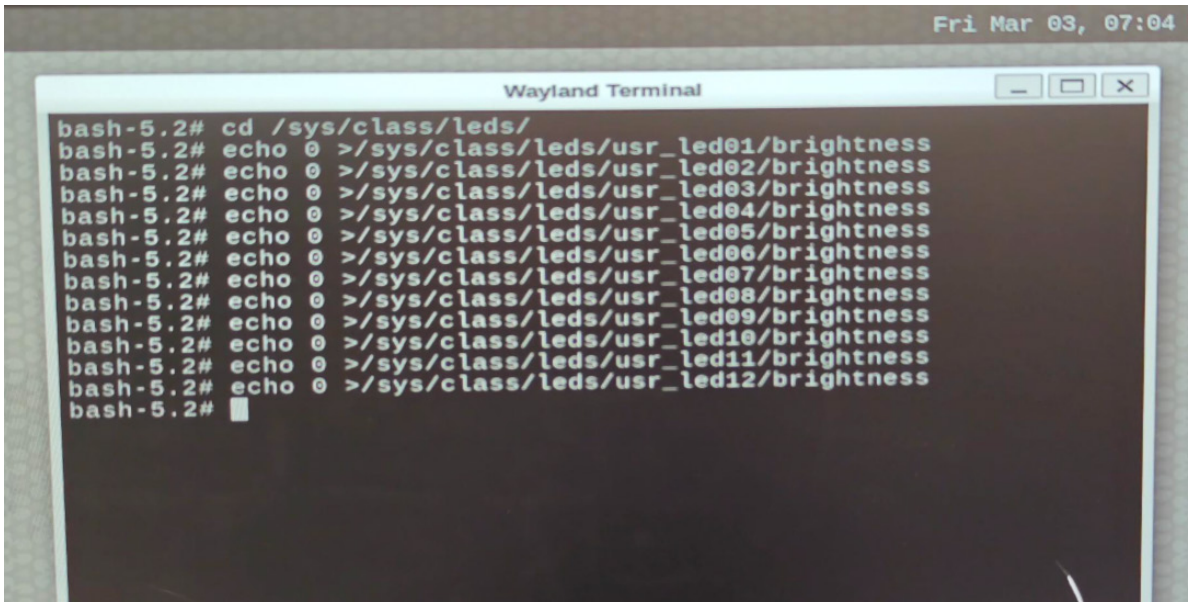

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

LED1~LED12 OFF

```
#cd /sys/class/ leds /
# echo 0 > /sys/class/leds/usr_led01/brightness
# echo 0 > /sys/class/leds/usr_led02/brightness
# echo 0 > /sys/class/leds/usr_led03/brightness
# echo 0 > /sys/class/leds/usr_led04/brightness
# echo 0 > /sys/class/leds/usr_led05/brightness
# echo 0 > /sys/class/leds/usr_led06/brightness
# echo 0 > /sys/class/leds/usr_led07/brightness
# echo 0 > /sys/class/leds/usr_led08/brightness
# echo 0 > /sys/class/leds/usr_led9/brightness
# echo 0 > /sys/class/leds/usr_led10/brightness

6.4 RS-485/422/232 Test

In the BIOS, select the serial port mode for each pin-definition wiring, and perform the tests according to the procedures below.

6.4.1 RS-485 Connector Pin Definitions and Wiring Methods

PIN	RS-232	RS-422	RS-485
8	GND	GND	GND
9	-	TX-	D-
10	-	RX-	-
11	RXD	TX+	D+
12	TXD	RX+	-

RS-485

AVA-1000		Device
PIN	RS-485	RS-485
8	GND	GND
9	D-	D-
10	-	-
11	D+	D+
12	-	-

RS-422

AVA-1000		Device
PIN	RS-422	RS-422
8	GND	GND
9	TX-	TX-
10	RX-	RX-
11	TX+	TX+
12	RX+	RX+

RS-232

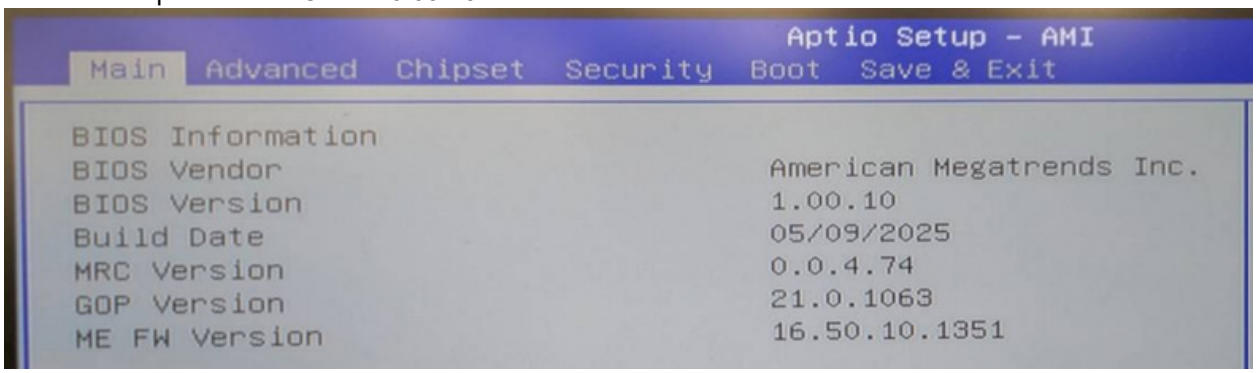

AVA-1000		Device
PIN	RS-232	RS-232
8	GND	GND
9	-	-
10	-	-
11	RXD	RXD
12	TXD	TXD

AVA-1000 RS-485 port DQA test method

BIOS version: 1.00.10

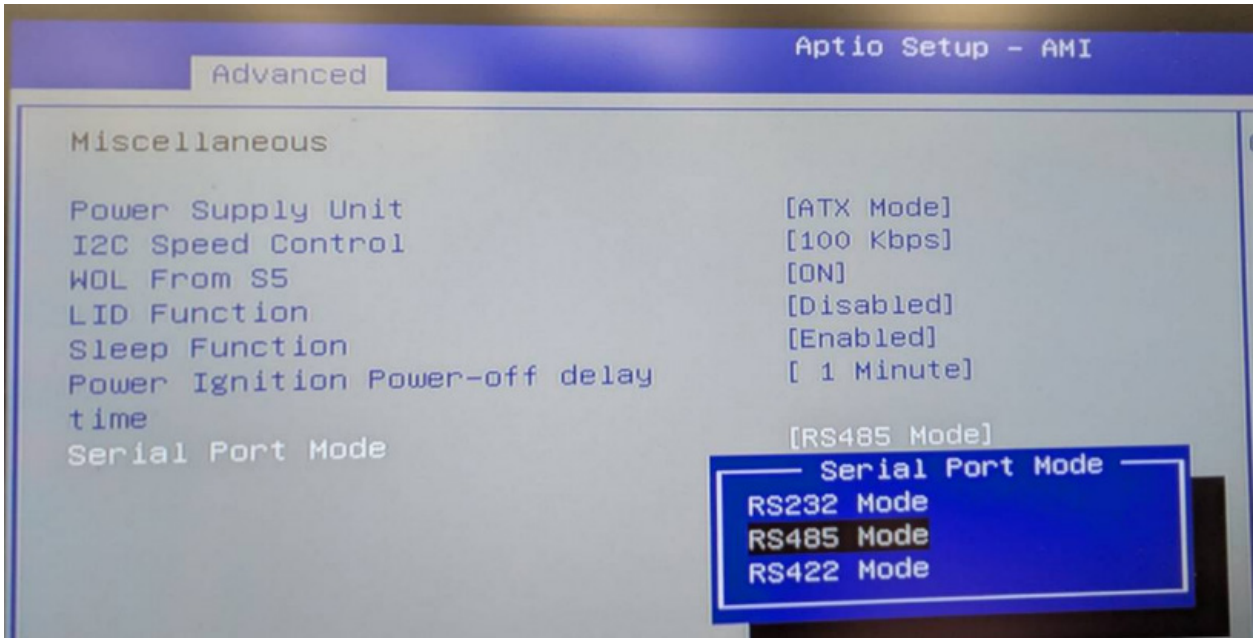

OS version (BSP): AVA-1000 1v3 (\\adlink-fs1\SEC\SEC_ReleaseForTPDC\AVA-1000 [5076]\BSP\ADLINK\x86\ubuntu\64bit\Image\1v3)

1. Please update the BIOS to v0.09.10 or later.

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

2. Set the serial port mode to RS-485.
   Advanced > Miscellaneous > Serial Port Mode > RS485 Mode

3. In the OS, manage the RS-485 receive/transmit mode:

   (1) Open Terminal
   (2) Enter # sudo su
   (3) Enter # echo 800 > /sys/class/gpio/export

   ==========
   (3.1) Receive data:
   # echo 1 > /sys/class/gpio/gpio800/value
   (3.2) Transmit data:
   # echo 0 > /sys/class/gpio/gpio800/value

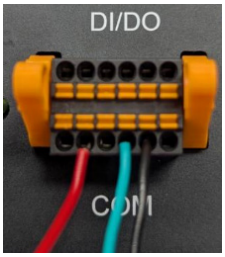

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

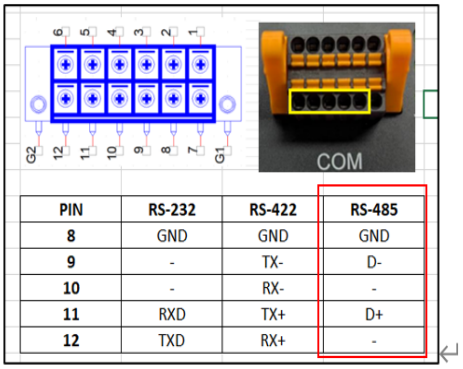

4. Open another terminal and use the `sudo putty` command to start the PuTTY program.
   Set PuTTY to: serial`/dev/ttyS4`.

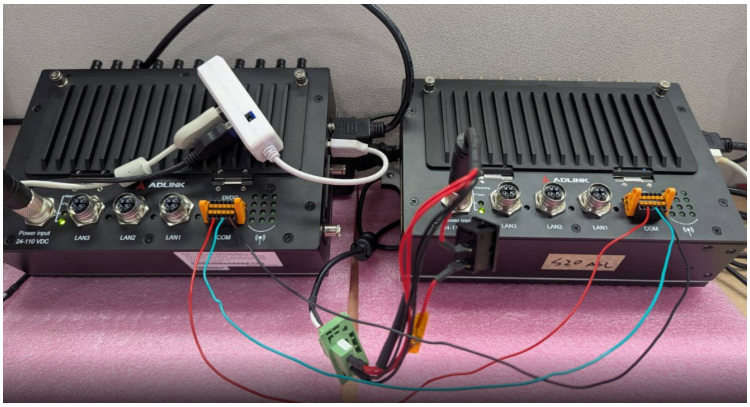

5. Refer to the attached RS-485 wiring diagram to connect the serial port of the other computer.

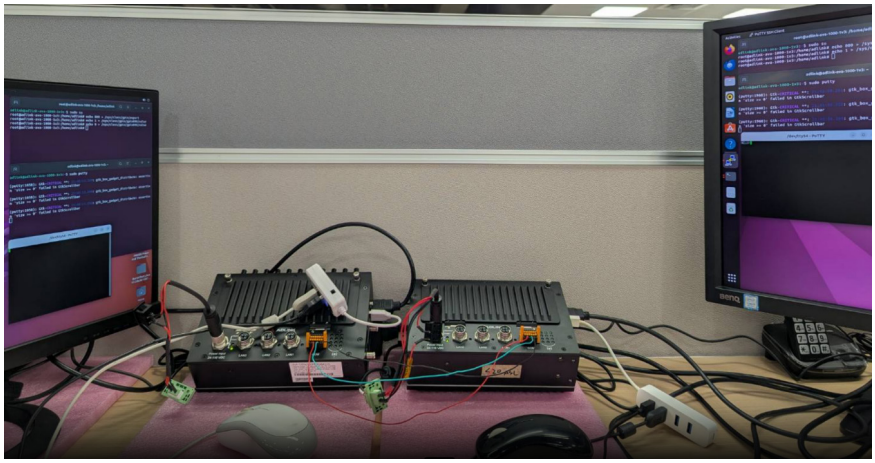

PIN	RS-232	RS-422	RS-485
8	GND	GND	GND
9	-	TX-	D-
10	-	RX-	-
11	RXD	TX+	D+
12	TXD	RX+	-

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

6. To switch the RS-485 port's receive/transmit commands, use Item 3 (3.1) or Item 3 (3.2).

(3.1) Receive data:
echo 1 > /sys/class/gpio/gpio800/value
(3.2) Transmit data:
echo 0 > /sys/class/gpio/gpio800/value

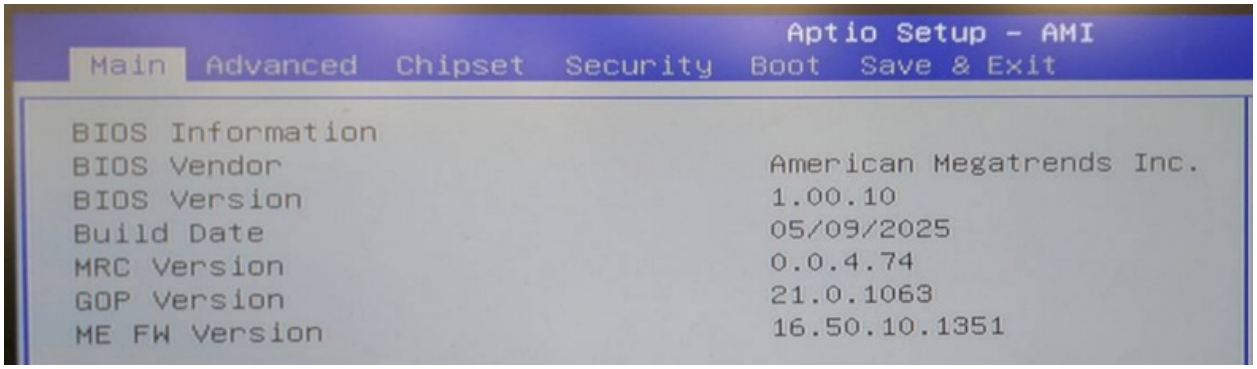

6.4.2 RS-422 Connector Pin Definitions and Wiring Methods

AVA-1000 RS-422 port DQA test method

BIOS version: 1.00.10

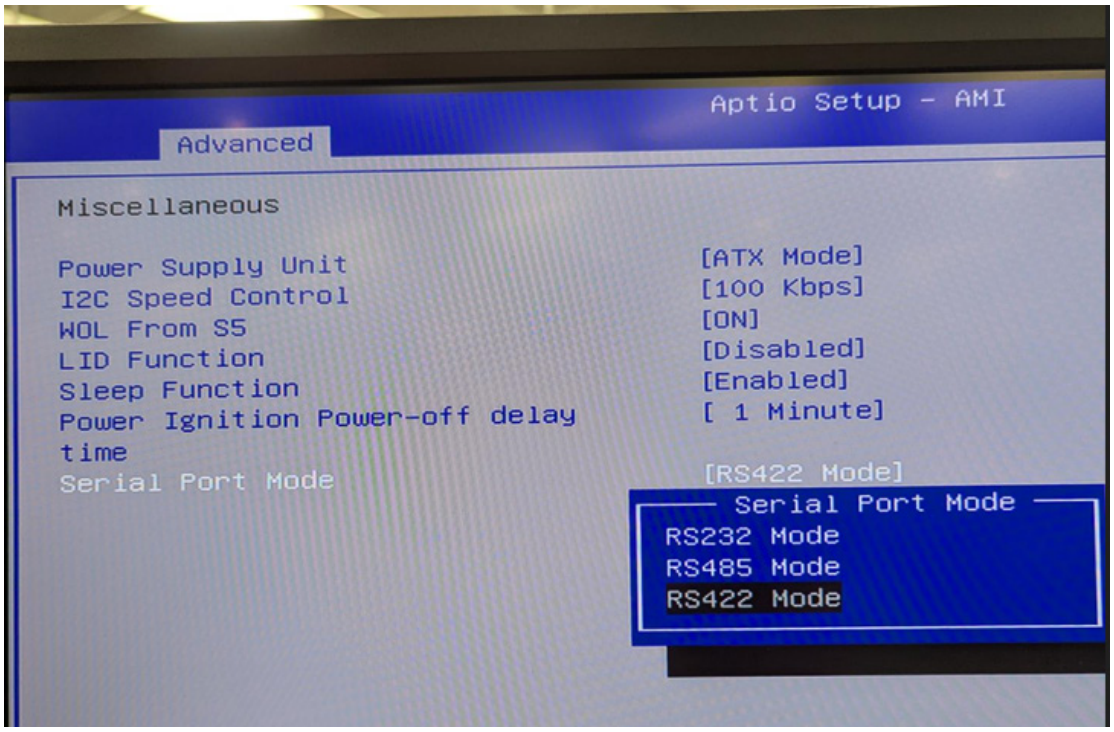

OS version(BSP): AVA-1000 1v3 (\\adlink-fs1\SEC\SEC_ReleaseForTPDC\AVA-1000 [5076]\BSP\ADLINK\x86\ubuntu\64bit\Image\1v3)

1. Update the BIOS to v0.09.10 or later.

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

2. Set the serial port mode to RS422.
   Advanced > Miscellaneous > Serial Port Mode > RS422 Mode

3. In the OS, manage the RS-422 receive/transmit mode:

(1) Open Terminal

(2) Enter # sudo su

(3) Enter # echo 800 > /sys/class/gpio/export

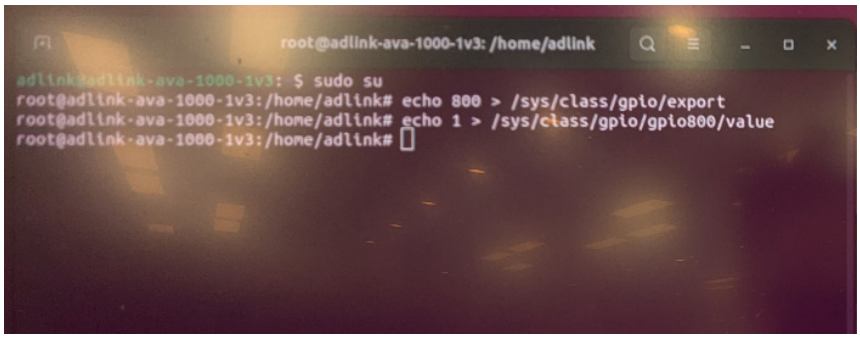

==========

(3.1) Receive data:

echo 1 > /sys/class/gpio/gpio800/value

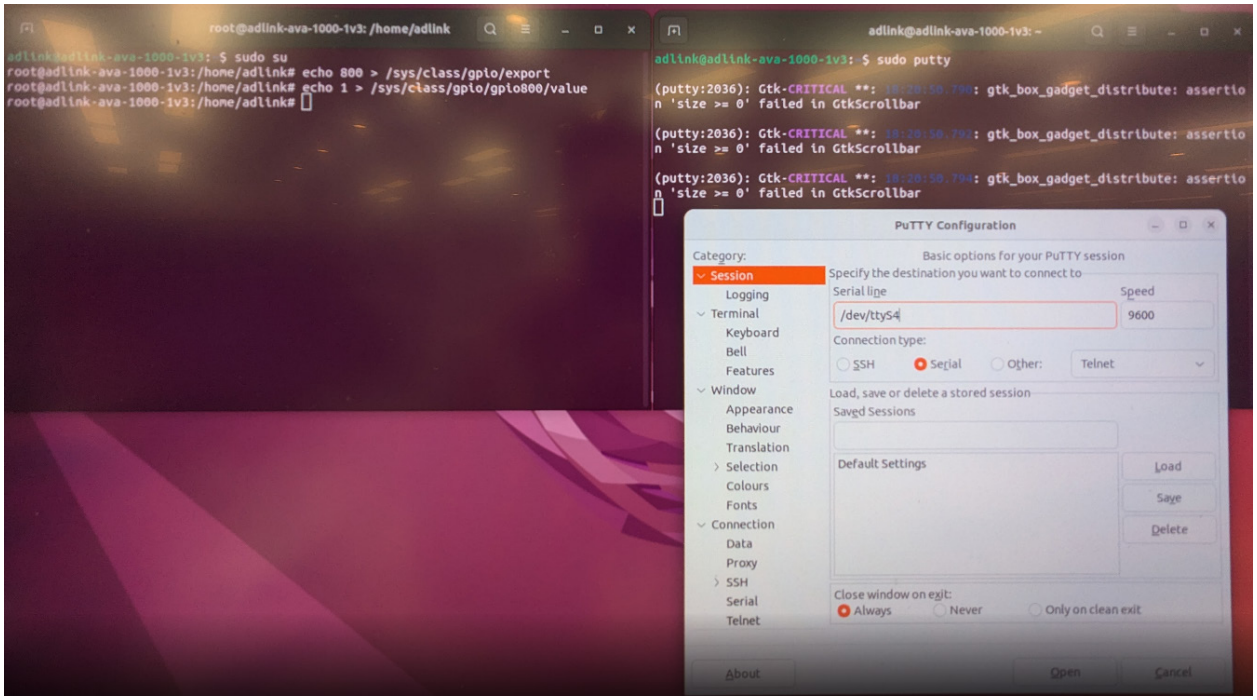

(3.2) Transmit data:

echo 0 > /sys/class/gpio/gpio800/value

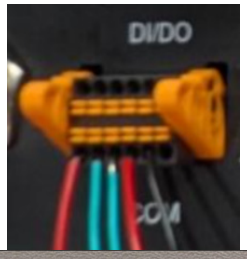

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

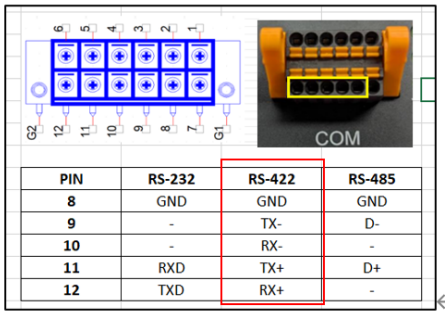

4. Open another terminal and use the `sudo putty` command to start the PuTTY program.
   Set PuTTY to: serial `/dev/ttyS4`.

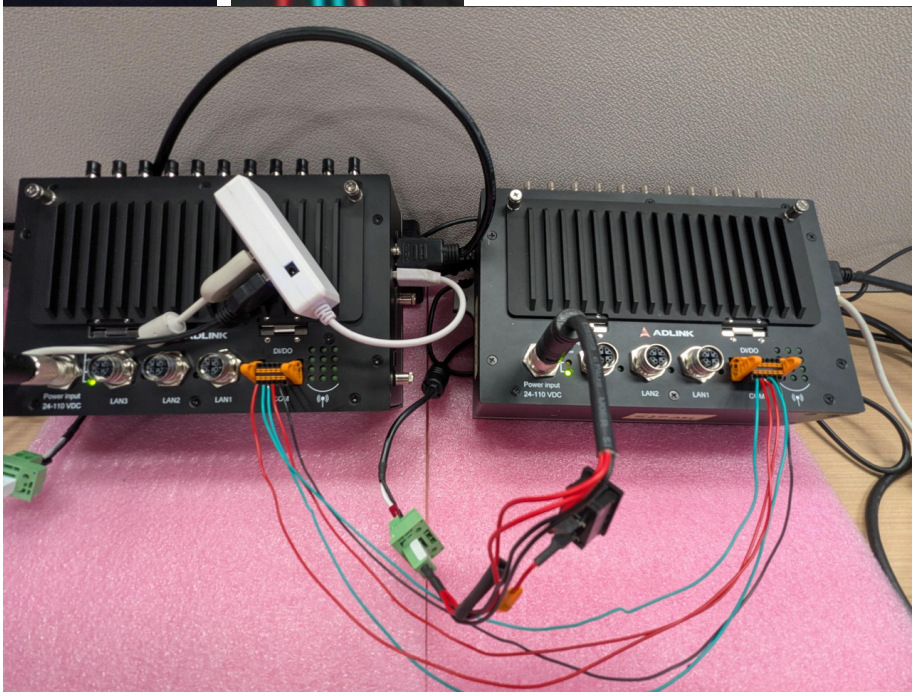

5. Refer to the attached RS-422 wiring diagram to connect the serial port of the other computer.

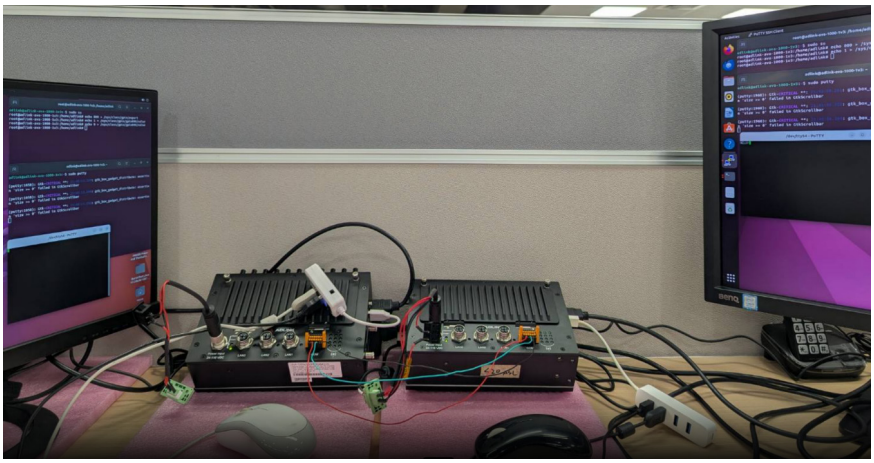

PIN	RS-232	RS-422	RS-485
8	GND	GND	GND

Safety Instructions

For user safety, please read and follow all instructions, Warnings, Cautions, and Notes marked in this manual and on the associated device before handling/operating the device, to avoid injury or damage.

S'il vous plaît prêter attention stricte à tous les avertissements et mises en garde figurant sur l'appareil , pour éviter des blessures ou des dommages.

- Read these safety instructions carefully.
- Keep the User's Manual for future reference.
- Read the Specifications section of this manual for detailed information on the recommended operating environment.
- When installing/mounting or uninstalling/removing device; or when removal of a chassis cover is required for user servicing:
  [> Turn off power and unplug any power cords/cables.
  [> Reinstall all chassis covers before restoring power.
- To avoid electrical shock and/or damage to device:
  [> Keep device away from water or liquid sources.
  [> Keep device away from high heat or humidity.
  [> Keep device properly ventilated (do not block or cover ventilation openings).
  [> Always use recommended voltage and power source settings.
  [> Always install and operate device near an easily accessible electrical outlet.
  [> Secure the power cord (do not place any object on/over the power cord) and connect it to a socket-outlet with earthing connection.
  [> Only install/attach and operate device on stable surfaces and/or recommended mountings.
- If the device will not be used for long periods of time, turn off and unplug from its power source.
- Never attempt to repair the device, which should only be serviced by qualified technical personnel using suitable tools.
- A Lithium-type battery may be provided for uninterrupted backup or emergency power.

CAUTION:

Risk of explosion if battery is replaced with one of an incorrect type; please dispose of used batteries appropriately.

Risque d'explosion si la pile est remplacée par une autre de type incorrect. Veuillez jeter les piles usagées de façon appropriée.

- The device must be serviced by authorized technicians when:
  [> The power cord or plug is damaged.
  [> Liquid has entered the device interior.
  [> The device has been exposed to high humidity and/or moisture.
  [> The device is not functioning or does not function according to the User's Manual.
  [> The device has been dropped and/or damaged and/or shows obvious signs of breakage.
- Disconnect the power supply cord before loosening the thumbscrews and always fasten the thumbscrews with a screwdriver before starting the system up.
  [> The equipment is not intended to be installed or used in a home, school, or public area accessible to the general population.
  [> The knurled thumb screws with slotted heads for each Node module should be tightened with a tool after both initial installation and subsequent use.
- It is recommended that the device be installed only in a server room or computer room where access is:
  [> Restricted to qualified service personnel or users familiar with restrictions applied to the location, reasons therefore, and any precautions required.
  [> Only afforded by the use of a tool or lock and key, or other means of security, and controlled by the authority responsible for the location.
- Please use an approved power source certified by IEC or UL. If you need an adapter, optional accessories, or further assistance, please contact ADLINK for more information.

BURN HAZARD
Touching this surface could result in bodily injury. To reduce risk, allow the surface to cool before touching.

RISQUE DE BRÛLURES
Ne touchez pas cette surface, cela pourrait entraîner des blessures. Pour éviter tout danger, laissez la surface refroidir avant de la toucher.

- Lisez attentivement ces consignes de sécurité
- *Conservez le manuel de l'utilisateur pour pouvoir le consulter ultérieurement*
- *Lisez la section Spécifications de ce manuel pour des informations détaillées sur l'environnement d'exploitation recommandé*
- Lors de l'installation/montage ou de la désinstallation/retrait de l'appareil ; ou lorsque le retrait d'un boîtier est nécessaire pour l'entretien par l'utilisateur (voir Mise en route) :
  - Éteignez l'alimentation et débranchez tous les cordons/câbles d'alimentation.
  - Réinstallez tous les panneaux du boîtier avant de remettre l'alimentation sous tension.
- *Pour éviter les chocs électriques et/ou d'endommager l'appareil :*

  - *Tenez l'appareil à l'écart de toute source d'eau ou de liquide*
  - *Tenez l'appareil à l'écart d'une forte chaleur ou d'une humidité élevée*
  - *Maintenez l'appareil correctement ventilé (n'obstruer ou ne couvrez pas les ouvertures de ventilation)*
  - *Utilisez toujours les réglages de tension et de source d'alimentation recommandés*
  - *Installez et utilisez toujours l'appareil près d'une prise de courant facilement accessible*
  - Fixez le cordon d'alimentation (ne placez aucun objet sur/au-dessus du cordon d'alimentation) et connectez-le à une prise de courant avec mise à la terre
- N'essayez jamais de réparer l'appareil, qui doit être réparé uniquement par du personnel technique qualifié *et utilisant des outils appropriés.*
  - *Lors de l'installation/montage ou de la désinstallation/retrait d'un périphérique, ou lorsque le retrait d'un couvercle de châssis est requis pour l'entretien par l'utilisateur :*
  - *Coupez l'alimentation et débranchez tous les cordons/câbles d'alimentation.*
- *Réinstallez tous les capots du châssis avant de rétablir l'alimentation. Installez/fixez et utilisez l'appareil uniquement sur des surfaces stables et/ou des supports recommandés.*
- *Si l'appareil n'est pas utilisé pendant une longue période, éteignez-le et débranchez-le de sa source d'alimentation.*
- *Une batterie de type lithium peut être fournie pour une alimentation de secours ou de secours ininterrompue.*

  - *L'appareil doit être réparé par des techniciens agréés lorsque :*
  - *Le cordon d'alimentation ou la fiche est endommagé.*
  - *Du liquide est entré dans l'appareil. € L'appareil a été exposé à une humidité élevée et/ou à l'humidité.*
  - *L'appareil ne fonctionne pas ou ne fonctionne pas conformément au manuel de l'utilisateur.*

- *L'appareil est tombé et/ou a été endommagé et/ou présente des signes évidents de casse.*
- *Débranchez le cordon d'alimentation avant de desserrer les vis moletées et fixez toujours les vis moletées avec un tournevis avant de démarrer le système.*
  - *L'équipement n'est pas destiné à être installé ou utilisé dans une maison, une école ou une zone publique accessible au grand public.*
  - *Les vis à molette avec têtes fendue pour chaque module Node doivent être serrées avec un outil après l'installation initiale et lors de l'utilisation suivante.*
- *Il est recommandé d'installer l'appareil uniquement dans une salle de serveurs ou une salle informatique dont l'accès est :*

  - *Réservé au personnel de service qualifié ou aux utilisateurs familiers avec les restrictions appliquées à l'emplacement, les raisons de celles-ci et les précautions requises.*
  - *Autorisé uniquement par l'utilisation d'un outil ou d'une serrure et d'une clé, ou d'autres moyens de sécurité, et contrôlé par l'autorité responsable du lieu.*

Veuillez utiliser une source d'alimentation approuvée et certifiée par la norme IEC ou UL. Si vous avez besoin d'un adaptateur, d'accessoires en option ou d'une assistance supplémentaire, veuillez contacter ADLINK pour plus d'informations.
