DAQMaster is scheduled for discontinuation as of Dec, 2014. Please refer to the following information for recommended software support.

For new applications, we recommend returning to DASK driver & SDK and DAQPilot as alternatives. 5 individual SDK packages support different ADLINK DAQ/DSA/Digitizer product lines, including PCIS-DASK, D2K-DASK, WD-DASK, DSA-DASK and UD-DASK, all with advanced 32-/64-bit kernel drivers and 32-bit/64-bit DLL libraries providing a common set of Application Programming Interfaces (APIs) for custom application development. DAQPilot is the LabVIEW® VI driver and Library supporting ALL ADLINK DAQ/DIO modules. Table 1 shows product line vs. SDK, and Table 2 recommended alternatives for corresponding DAQMaster manager functions.
