Using this Manual

Audience and Scope

The NuPRO-E340 User's Manual is intended for hardware technicians and systems operators with knowledge of installing, configuring and operating industrial grade single board computers.

Manual Organization

This manual is organized as follows:

Preface: Presents important copyright notifications, disclaimers, trademarks, and associated information on the proper understanding and usage of this document and its associated product(s).

Chapter 1, Introduction: Introduces the NuPRO-E340, its features, applications, and specifications, including functional descriptions and board layout.

Chapter 2, Hardware Information: Provides technical information on connectors and jumpers for configuring the NuPRO-E340.

Chapter 3, Getting Started: Illustrates how to install components on the NuPRO-E340 such as CPU, heatsink, and memory modules.

Chapter 4, Driver Installation: Provides information on how to install the NuPRO-E340 device drivers.

Chapter 5, BIOS Setup: Describes basic navigation for the AMIBIOS®8 BIOS setup utility.

Appendix A, Watchdog Timer: Presents information on implementing the watchdog timer.

Appendix B, System Resources: Presents information on I/O mapping, IRQ routing, and resource allocation.

Important Safety Instructions: Presents safety instructions all users must follow for the proper setup, installation and usage of equipment and/or software.

Getting Service: Contact information for ADLINK's worldwide offices.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

Conventions

Take note of the following conventions used throughout this manual to make sure that users perform certain tasks and instructions properly.

NOTE: Additional information, aids, and tips that help users perform tasks.

CAUTION: Information to prevent ***minor*** physical injury, component damage, data loss, and/or program corruption when trying to complete a task.

WARNING: Information to prevent ***serious*** physical injury, component damage, data loss, and/or program corruption when trying to complete a specific task.

1 Introduction

1.1 Overview

The ADLINK NuPRO-E340 is a PICMG 1.3 System Host Board (SHB) supporting the next-generation Intel® Core™ i7/i5/i3 and Pentium® processors in LGA1155 package to deliver a scalable high performance platform for a wide array of industrial applications. The NuPRO-E340 supports 32nm process CPUs at up to 3.4 GHz with integrated graphics and memory controllers, Direct Media Interface (DMI) and Flexible Display Interface (FDI) connectivity to the Intel® Q67 Express Chipset. Dual-channel DDR3 1066/1333 MHz memory is supported up to a maximum of 8 GB in two DIMM slots.

These advanced features, coupled with PCI Express® x16 expansion capability, dual PCI Express®-based Gigabit Ethernet, SATA 6 Gb/s and USB 3.0 support make the NuPRO-E340 ideal for vision and automation control applications.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

1.2 Features

- Supports Intel® Core™ i7/i5/i3 and Pentium® processors in LGA1155 package
- Integrated Intel® HD Graphics
- PCI Express® x16 expansion capability via backplane
- Dual Gigabit Ethernet
- 2x USB 3.0 ports onboard
- 12x USB 2.0 ports (8x onboard, 4x on backplane)
- 2x SATA 6 Gb/s ports onboard
- 4x SATA 3 Gb/s ports (2x onboard, 2x on backplane)
- 6x COM ports (including 1x RS-232/422/485/485+)
- Watchdog Timer, Hardware Monitor
- Optional HD audio kit (DB-Audio2 daughter board)
- TPM hardware security chip
- RoHS compliant

NOTE:

To purchase the optional DB-Audio2 daughter board, please contact your ADLINK sales representative.

1.3 Specifications

System	
CPU	• Intel® Core™ i7-2600, 3.4 GHz, 8M Cache, 95W TDP • Intel® Core™ i5-2400, 3.1 GHz, 6M Cache, 95W TDP • Intel® Core™ i3-2120, 3.3 GHz, 3M Cache, 65W TDP • Intel® Pentium® G850, 2.9GHz, 3M Cache, 65W TDP
Chipset	• Intel® Q67 Platform Controller Hub
Memory	• Two 240-pin DIMM sockets support dual-channel 1066/1333 MHz DDR3 (up to 8 GB)
BIOS	• AMIBIOS in 64-Mbit SPI Flash
Audio	• Intel® High Definition Audio support via DB-Audio2 daughter board
Watch Dog Timer	• 1-255 second or 1-255 minute programmable and can generate system reset.
Hardware Monitor	• CPU/System temperature, fan speed and onboard DC voltage
TPM	• Infineon SLB 9635 TT 1.2
Operating Systems	• Windows® XP, 7 32/64-bit, • Fedora™ 14 • Red Hat® Enterprise Linux® 5
I/O Interfaces	
I/O Ports	• 2x USB 3.0 port on rear panel • 8x USB 2.0 via onboard header, 4x via backplane • 2x SATA 6 Gb/s ports onboard • 4x SATA 3 Gb/s ports (2x onboard, 2x on backplane) • 6x serial ports via onboard pin-header (5x RS-232, 1x RS-232/422/485/485+) • 2x Gigabit Ethernet RJ45 ports • 1x VGA port (Dsub-15) • 1x DVI-D via onboard pin-header (opt. cable bracket) • 1x parallel port
PCIe/PCI	• PCIe-x16, PCIe-x4 and PCI 32bit/33MHz via golden fingers
Graphics	
Integrated	• Integrated Intel® HD Graphics
External	• PCI Express x16

Table 1-1: NuPRO-E340 General Specifications

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

Ethernet	
Controller	• Dual Gigabit Ethernet (Intel® 82579LM Gigabit Ethernet PHY, Intel® 82574L Gigabit Ethernet Controller) • Supports Preboot Execution Environment (PXE), Wake-On-LAN, and Intel® AMT 7.0 on LAN1 (82579LM)
Ports	• Two RJ-45 Ethernet ports
Mechanical and Environment	
Form Factor	• Standard full-size PICMG 1.3 SHB
Dimensions	• 338 x 126 mm (L x W)
Operating Temp.	• 0ºC to 60ºC
Storage Temp.	• -20ºC to 80ºC
Relative Humidity	• 10% to 90% non-condensing
Safety	• CE, FCC Class A

1.5 Functional Description

Processor Support

The NuPRO-E340 is PICMG 1.3 System Host Board supporting the 2nd generation Intel® Core™ processor family (Intel® Core™ i7/i5/i3) in LGA1155 socket. An integrated memory controller supports dual channel 1066/1333 MHz DDR3 and Intel® HD Graphics is integrated onboard the CPU. The CPU provides a PCI Express x16 for external graphics or expansion. Direct Media Interface (DMI) and Flexible Display Interface (FDI) provide connectivity to the Intel® Q67 Express Chipset.

Intel® Q67 Express Chipset

The Intel® BD82Q67 Platform Controller Hub (PCH) combines with the processor to provide a compact yet powerful 2-chip solution. Direct Media Interface (DMI) is the chip-to-chip connection between the processor and PCH. Intel® Flexible Display Interface carries display traffic from the integrated graphics in the processor to the legacy display connectors in the PCH. The PCH supports all other required interfaces including PCI Express, SATA 6 Gb/s, USB 2.0, PCI, LPC, and SPI.

Dual-Channel DDR3 Memory

To meet the requirements of memory-intensive applications, the NuPRO-E340 has a dual-channel memory architecture supporting DDR3 1066/1333 MHz DIMMs. The key advantages of DDR3 are the higher bandwidth and the increase in performance at lower power than DDR2. DDR3 memory technology meets the requirements of the latest 3D graphics, multimedia, and network application, and boosts system performance by eliminating bottlenecks.

Gigabit Ethernet

The NuPRO-E340 utilizes an Intel® 82579LM Gigabit Ethernet PHY and Intel® 82574L Gigabit Ethernet Controller connected to the PCI-E bus of the Q67 PCH. Intel® AMT 7.0 (82579LM on LAN1), Wake-on-LAN and PXE are supported.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

Serial ATA

The NuPRO-E340 provides six Serial ATA ports with data transfer rates of up to 6.0 GB/s on 2 ports and up to 3.0 GB/s on 4 ports. Intel® Rapid Storage Technology supports AHCI and RAID 0/1/5/10 functionality.

Universal Serial Bus (USB 2.0/3.0)

The NuPRO-E340 provides 12 USB 2.0 ports supporting transfer rates up to 480 Mb/s and two USB 3.0 ports on the rear panel I/O supporting transfer rates up to 5 Gb/s (ASM1042 controller via PCIe). All ports are USB 2.0/1.1 compatible.

NOTE:

The USB 3.0 ports cannot be used to install Windows as the necessary drivers are currently not included with the OS. Linux kernels 2.6.31 and higher can be installed using the USB 3.0 ports.

Hardware monitoring

A built-in, proactive hardware monitoring system in the Super I/O monitors the CPU temperature, system fan speed, and voltage levels to prevent overheating and/or component damage, effect timely failure detection, and ensure stable supply of current for critical components.

Watchdog Timer

The watchdog timer (WDT) monitors system operations based on user-defined configurations. The WDT can be programmed for different time-out periods, such as from 1 to 255 seconds or from 1 to 255 minutes. The WDT generates a reset signal, then a reset request, after failure to strobe it within the programmed time period. A register bit may be enabled to indicate if the watchdog timer caused the reset event. The WDT register is cleared during the power-on sequence to enable the operating system to take appropriate action when the watchdog generates a reboot.

Trusted Platform Module

The NuPRO-E340 optionally supports TPM ver. 1.2 (Trusted Platform Module) for secure storage of keys, passwords and digital

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

certificates. Systems supporting TPM offer improved hardware-based security in numerous applications, such as file and folder encryption, local password management, S-MIME e-mail, VPN and PKI authentication and wireless authentication for 802.1x and LEAP.

Intel® Active Management Technology

Intel® Active Management Technology (Intel® AMT) is hardware-based technology for remotely managing and securing PCs out-of-band. Intel® AMT includes hardware-based remote management, security, power-management, and remote-configuration features. Intel® AMT allows remote access to a system when traditional techniques and methods are not available.

1.9 Package Contents

Before unpacking, check the shipping carton for any damage. If the shipping carton and/or contents are damaged, inform your dealer immediately. Retain the shipping carton and packing materials for inspection. Obtain authorization from the dealer before returning any product to ADLINK.

- NuPRO-E340
- SATA data cable with latch x2
- 2-port USB cable with bracket
- 2-port COM cable with bracket for COM1/COM2 (2.54 mm pitch)
- 2-port COM cable with bracket x2 for COM3-6 (2.0 mm pitch)
- Driver DVD
- User's manual

The NuPRO-E340 must be protected from static discharge and physical shock. Never remove any of the socketed parts except at a static-free workstation. Use the anti-static bag shipped with the product to handle the board. Wear a grounded wrist strap when installing and/or servicing.

2.4 Jumpers

Clear CMOS (JBAT1)

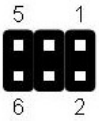

The CMOS RAM data contains the date / time and BIOS setting information. CMOS is powered by the onboard button cell battery. To erase the CMOS RAM data:

1. Power down and disconnect power from the system.
2. Short pins 2-3 on JP1.
3. Reconnect power and power up the system.
4. After power up, remove the jumper cap from pins 2-3 and reinstall it to pins 1-2.

RTC status	Connection	JBAT1
Normal	1 – 2	
Clear CMOS	2 – 3	

COM1 Mode Jumper Settings (JP1-4)

Short the jumper pins according to the following settings to set COM1 to RS-232/422/485/485+ mode:

	RS-232	RS-422	RS-485	RS-485+
JP1	1-2	3-4	5-6	5-6
JP2	1-3, 2-4	3-5, 4-6	3-5, 4-6	3-5, 4-6
JP3	1-3, 2-4	3-5, 4-6	3-5, 4-6	3-5, 4-6
JP4	–	1-3, 2-4	1-3, 2-4	3-5, 4-6

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

3 Getting Started

This chapter provides information on how to install components on the NuPRO-E340 SHB.

3.1 Installing the CPU

The NuPRO-E340 supports an Intel® Core™ i7/i5/i3 or Pentium® processor in an LGA1155 socket.

WARNING:

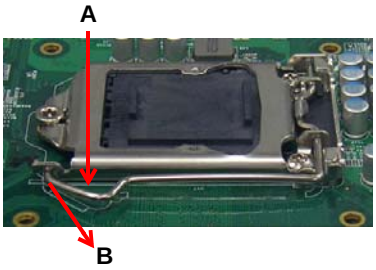

Disconnect all power to the board before installing a CPU to prevent damaging the board and CPU.

Do not touch socket contacts. Damaging the contacts voids the product warranty. Follow the installation instructions carefully to avoid damaging the board components.

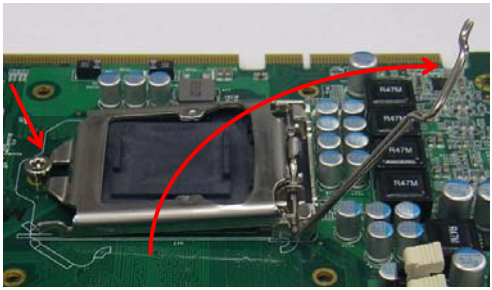

To install the CPU:

1. Press down on the locking arm (A), then push it away from the socket to disengage it from the retention tab (B).

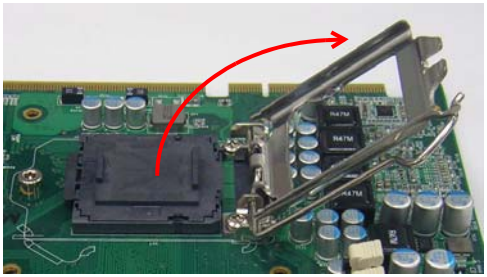

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

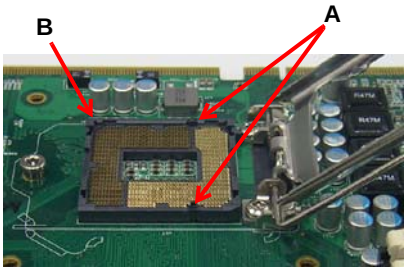

2. Raise the locking arm to unlock the load plate.

3. Lift the load plate to uncover the socket.

4. Remove the plastic protective cover from the socket. Note the locations of the alignment keys (A) and Pin 1 indicator (B).

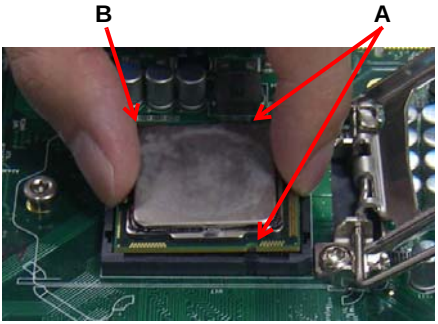

WARNING:

Do NOT touch socket contacts.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

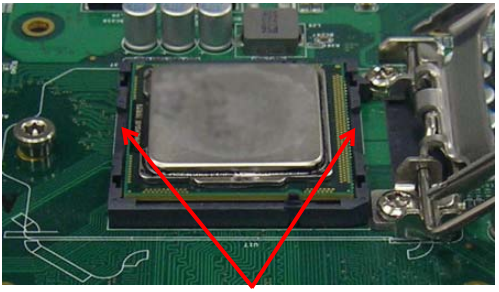

5. Hold the CPU using thumb and forefinger as shown. Position the CPU over the socket, matching the notches on the sides of the CPU with the alignment keys on the socket (A). The golden triangle on the CPU must be positioned at the corner of the socket with the Pin 1 indicator as shown (B).

WARNING:

The CPU fits into the socket in only one orientation. DO NOT force it into the socket to avoid causing damage.

6. Carefully place the CPU into the socket vertically. The socket has cutouts for your fingers to fit into.

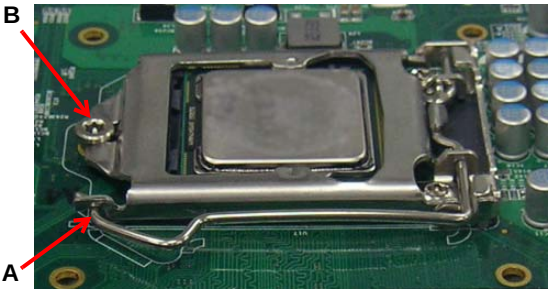

Cutouts

7. Gently lower the load plate. Make sure the front edge of the plate is under the screw as indicated.

8. Lower the locking arm and fasten it to the retention tab (A). The load plate should be locked underneath the screw as shown (B).

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

3.2 Installing the CPU Fan and Heatsink

The CPU requires a chassis with an airflow inlet and maximum internal ambient temperature of 50° C. A especially-designed CPU fan and heatsink must be installed before using the SHB. Failure to install a CPU fan and heatsink may damage the system host board and/or the CPU.

When the CPU fan installation procedures presented here are inconsistent with the installation procedures you obtained from the CPU fan and heatsink package, follow the latter.

To install the CPU fan:

1. Apply thermal grease evenly on top of the installed CPU.
2. Lower the CPU fan to the CPU, then secure it using the provided attachments or screws.
3. Connect the CPU fan cable to the CPU fan connector on the SHB labeled FAN1 (see “Board Layout” on page 15).

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

3.3 Installing Memory Modules

The NuPRO-E340 supports up to 8 GB of DDR3 1066/1333 MHz memory modules in two DIMM sockets. A DDR3 module has a 240-pin footprint compared to the legacy 184-pin DDR DIMM. DDR3 modules are notched to facilitate correct installation in the DIMM sockets.

Disconnect all power to the board before installing a memory module to prevent damaging the board and memory module .

Memory Configuration Options

The NuPRO-E340 supports 1GB, 2GB and 4GB unbuffered non-ECC DDR3 DIMMs in the following configurations:

- Channel A: DIMM1
  Channel B: DIMM2
- For dual-channel configuration, the total size of memory module installed per channel must be the same (DIMM1 = DIMM2).
- It is recommended that you install DIMMs with the same CAS latency. For maximum compatibility, install memory modules with the same brand, model, and/or rating.

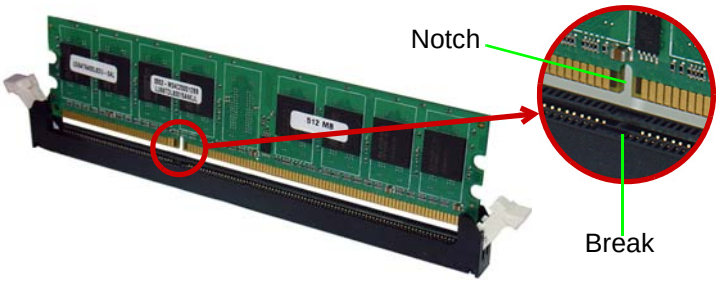

To install a memory module:

1. Locate the DIMM sockets on the motherboard.
2. Press the socket's retaining clips outward to unlock.

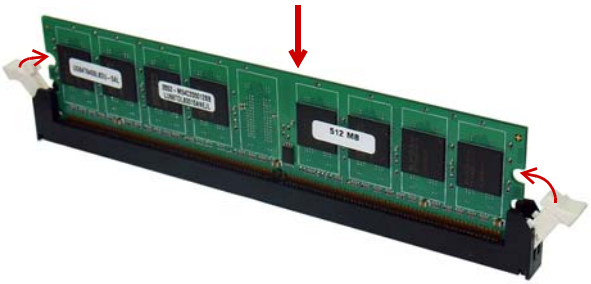

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

3. Align the memory module on the socket making sure that the notch matches the break on the socket.

4. Insert the module firmly into the slot until the retaining clips snap back inwards and the module is securely seated.

4 Driver Installation

This chapter provides information on how to install the NuPRO-E340 device drivers under Windows XP. The device drivers are located in the following ADLINK All-in-One DVD directories:

Chipset	\NuPRO\NuPRO-E340\Chipset\
Display	\NuPRO\NuPRO-E340\VGA\
Ethernet	\NuPRO\NuPRO-E340\Ethernet\
TPM	\NuPRO\NuPRO-E340\TPM\
.Net Framework	\NuPRO\NuPRO-E340\VGA\
Rapid Storage	\NuPRO\NuPRO-E340\Others\
USB 3.0	\NuPRO\NuPRO-E340\Others\
Audio	\Audio Daughter Board\DB-Audio2\

Install the Windows operating system before installing any driver. Most standard I/O device drivers are installed during Windows installation.

NOTE:

The USB 3.0 ports cannot be used to install Windows as the necessary drivers are currently not included with the OS. Linux kernels 2.6.31 and higher can be installed using the USB 3.0 ports.

NOTE:

In order to enable RAID or AHCI mode, you must pre-install the Intel® Rapid Storage Technology driver during the Windows* installation process. using the F6 installation method.
*Not required for Windows Vista and Windows 7.

4.1 Intel® Rapid Storage Technology Driver

1. Create a floppy image as described in the F6Readme.txt file contained in **X:\NuPRO\NuPRO-E340\Others\ F6_SATA_Floppy_Install_Image_WinXP32_WinVISTA32_ IRST 9.5.0.1037.zip**.
2. During Windows installation, press **F6** when you see the message "*Press F6 if you need to install a third party SCSI or RAID driver.*" Then press **S** to *Specify Additional Device*.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

3. Insert the floppy disk and follow the remaining instructions. Leave the disk in until the system has rebooted and copied the necessary files, then remove the disk.

4.2 Intel® Q67 Express Chipset Driver

This section describes the installation of the Intel® Q67 Express chipset driver.

1. Locate the directory **X:\NuPRO\NuPRO-E340\Chipset** on the ADLINK All-in-One DVD, and extract the file **setup.exe** from the following archive: **Chipset driver_ Intel_INF_Update_Utility_All_WinOS.zip**.
2. Run the program **setup.exe** and follow the onscreen instructions. Restart the system if prompted.

4.3 Display Driver

Integrated Intel® HD Graphics

This section describes the driver installation for the Integrated Intel® HD Graphics.

Follow these instructions to install the display driver:

1. Locate the directory **X:\NuPRO\NuPRO-E340\VGA** on the ADLINK All-in-One DVD, and extract the contents of the following archive: **Microsoft_Net_Framework_v3.5_SP1.zip**
2. Run the program **Microsoft_Net_Framework_v3.5_SP1.exe** and follow the onscreen instructions.Restart the system if prompted.
3. Locate the directory **X:\NuPRO\NuPRO-E340\VGA** on the ADLINK All-in-One DVD, and extract the file **setup.exe** from the following archive: **VGA_winxp.zip**.
4. Run the program **setup.exe** and follow the onscreen instructions. Restart the system if prompted.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

4.4 Ethernet Driver

Follow these instructions to install the Ethernet driver.

1. Locate the directory **X:\NuPRO\NuPRO-E340\Ethernet** on the ADLINK All-in-One DVD, and extract the file **Autorun.exe** from the following archive: **Network_driver_Intel_Network_Adapter_For_Win32.zip**.
2. Run the program **Autorun.exe** and follow the onscreen instructions. Restart the system if prompted.

4.5 Intel® Rapid Storage Technology Utility

Follow these instructions to install the Intel® Rapid Storage Technology utility.

1. Locate the directory **X:\NuPRO\NuPRO-E340\Others** on the ADLINK All-in-One DVD, and extract the file **setup.exe** from the following archive: **Intel_Rapid_Storage_Technology_All_WinOS_v9.5.0.1037.zip**.
2. Run the program **setup.exe** and follow the onscreen instructions. Restart the system if prompted.

4.6 Intel® Active Management Technology

Follow these instructions to install the Intel® Active Management Technology driver.

1. Locate the directory **X:\NuPRO\NuPRO-E340\Others** on the ADLINK All-in-One DVD, and extract the file **setup.exe** from the following archive: **ME_SW.zip**.
2. Run the program **setup.exe** and follow the onscreen instructions. Restart the system if prompted.

4.7 TPM Driver

Follow these instructions to install the TPM driver.

1. Locate the directory **X:\NuPRO\NuPRO-E340\TPM** on the ADLINK

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

All-in-One DVD, and extract the file **setup.exe** from the following archive: **TPM_HostSW_3.7_IFX_RTM.zip**.

2. Run the program **setup.exe** and follow the onscreen instructions. Restart the system if prompted.

4.8 USB 3.0 Driver

Follow these instructions to install the TPM driver.

1. Locate the directory **X:\NuPRO\NuPRO-E340\Others** on the ADLINK All-in-One DVD, and extract the file **setup.exe** from the following archive: **USB3.0.zip**.
2. Run the program **setup.exe** and follow the onscreen instructions. Restart the system if prompted.

4.9 Audio Driver

Follow these instructions to install the audio driver for the optional DB-Audio2 daughter board.

Before installing the audio driver, check the BIOS settings to make sure that audio is enabled: **Chipset > PCH Configuration > HDA Controller** (see “PCH Bridge Configuration” on page 61).

1. Place the ADLINK All-in-One DVD to the optical drive.
2. Locate the audio driver from the directory **X:\Audio Daughter Board\DB-Audio2**, then double-click on the **setup.exe** file to start installation.
3. Follow the screen instructions to complete installation, then restart the system if prompted.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5 BIOS Setup

The following chapter describes basic navigation for the AMIBIOS® EFI BIOS setup utility.

5.1 Starting the BIOS

To enter the setup screen, follow these steps:

1. Power on the motherboard
2. Press the < Delete > key on your keyboard when you see the following text prompt:
   < Press DEL to run Setup >
3. After you press the < Delete > key, the main BIOS setup menu displays. You can access the other setup screens from the main BIOS setup menu, such as Chipset and Power menus.

Note: In most cases, the < Delete > key is used to invoke the setup screen. There are several cases that use other keys, such as < F1 >, < F2 >, and so on.

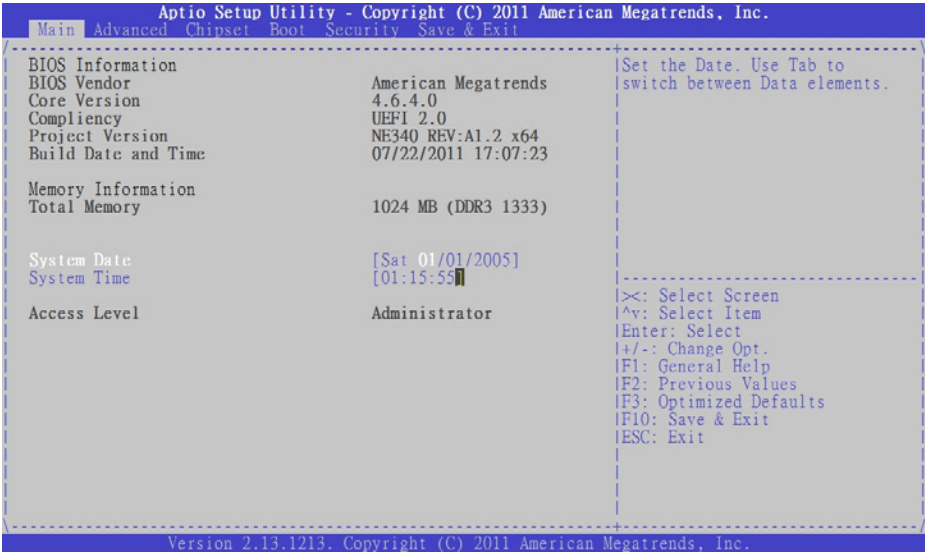

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

Setup Menu

The main BIOS setup menu is the first screen that you can navigate. Each main BIOS setup menu option is described in this user's guide.

The Main BIOS setup menu screen has two main frames. The left frame displays all the options that can be configured. "Grayed" options cannot be configured, "Blue" options can be.

The right frame displays the key legend. Above the key legend is an area reserved for a text message. When an option is selected in the left frame, it is highlighted in white. Often a text message will accompany it.

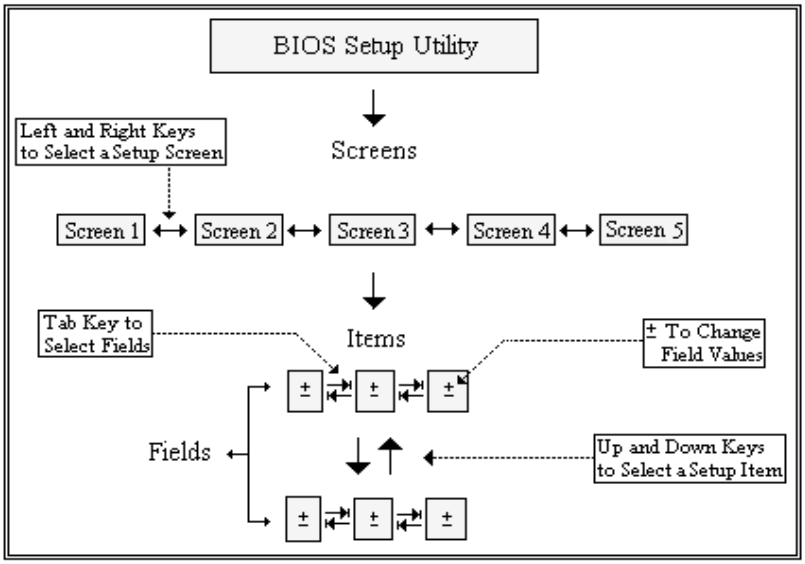

Navigation

The BIOS setup/utility uses a key-based navigation system called hot keys. Most of the BIOS setup utility hot keys can be used at any time during the setup navigation process.

These keys include < F1 >, < F10 >, < Enter >, < ESC >, < Arrow > keys, and so on. .

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

Note: There is a hot key legend located in the right frame on most setup screens.

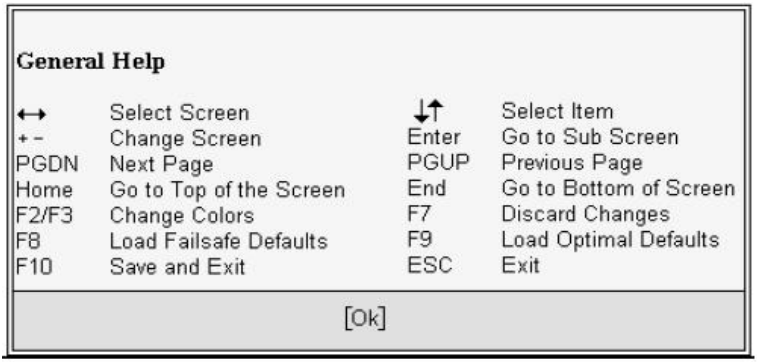

The < F8 > key on your keyboard is the Fail-Safe key. It is not displayed on the key legend by default. To set the Fail-Safe settings of the BIOS, press the < F8 > key on your keyboard. It is located on the upper row of a standard 101 keyboard. The Fail-Safe settings allow the motherboard to boot up with the least amount of options set. This can lessen the probability of conflicting settings.

Hotkey Descriptions

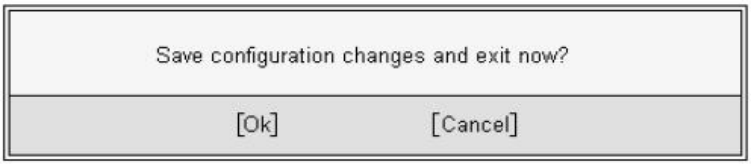

F1 The < F1 > key allows you to display the General Help screen.

Press the < F1 > key to open the General Help screen.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

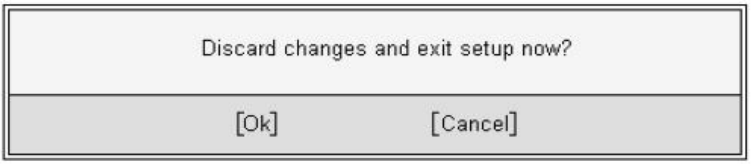

F10 The < F10 > key allows you to save any changes you have made and exit Setup. Press the < F10 > key to save your changes. The following screen will appear:

Press the < Enter > key to save the configuration and exit. You can also use the < Arrow > key to select Cancel and then press the < Enter > key to abort this function and return to the previous screen.

ESC The < Esc > key allows you to discard any changes you have made and exit the Setup. Press the < Esc > key to exit the setup without saving your changes. The following screen will appear:

Press the < Enter > key to discard changes and exit. You can also use the < Arrow > key to select Cancel and then press the < Enter > key to abort this function and return to the previous screen.

Enter The < Enter > key allows you to display or change the setup option listed for a particular setup item. The < Enter > key can also allow you to display the setup sub-screens.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.2 Main Setup

When you first enter the Setup Utility, you will enter the Main setup screen. You can always return to the Main setup screen by selecting the Main tab. There are two Main Setup options. They are described in this section. The Main BIOS Setup screen is shown below.

System & Board Info

BIOS Vendor

Displays the BIOS vendor.

Core Version

Displays the BIOS core version.

Compliancy

Displays the current BIOS compliancy.

Project Version

Displays the current BIOS revision.

Build Date and Time

Displays the BIOS build data.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

System Time/System Date

Use this option to change the system time and date. Highlight System Time or System Date using the < Arrow > keys. Enter new values using the keyboard. Press the < Tab > key or the < Arrow > keys to move between fields. The date must be entered in MM/DD/YY format. The time is entered in HH:MM:SS format.

Note: The time is in 24-hour format. For example, 5:30 A.M. appears as 05:30:00, and 5:30 P.M. as 17:30:00.

Access Level

Displays the current system access level.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.3 Advanced BIOS Setup

Select the Advanced tab from the setup screen to enter the Advanced BIOS Setup screen. You can select any of the items in the left frame of the screen, such as SuperIO Configuration, to go to the sub menu for that item. You can display an Advanced BIOS Setup option by highlighting it using the < Arrow > keys. The Advanced BIOS Setup screen is shown below.

The sub menus are described on the following pages.

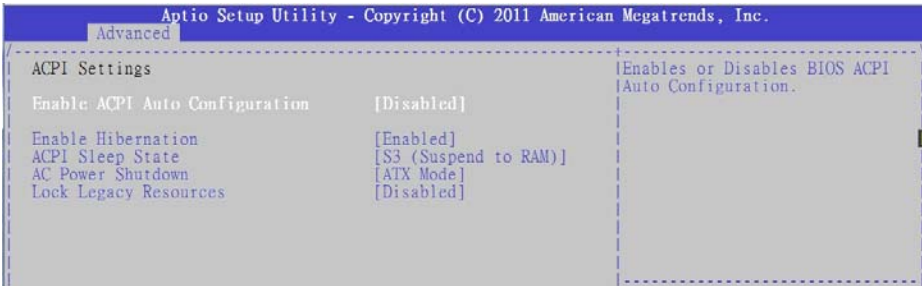

Launch PXE OpROM

Boot Option for Legacy Network Devices. Options: Enabled/ Disabled.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.3.1 ACPI Settings

Enable APIC Auto Configuration

BIOS ACPI Auto Configuration. Options: Enabled/Disabled.

Enable Hibernation

Enable or disable the system's ability to hibernate (S4 sleep state). This option may be not effective with some OS's.

ACPI Sleep State

Select the highest ACPI sleep state the system will enter, when the SUSPEND button is pressed. Options: S1, S3, Suspend Disable.

AC Power Shutdown

ATX mode: OS will turn off system power when shutdown.
AT mode: OS show It is now safe to turn off your computer.

NOTE: AT mode will not support S3 & S4.

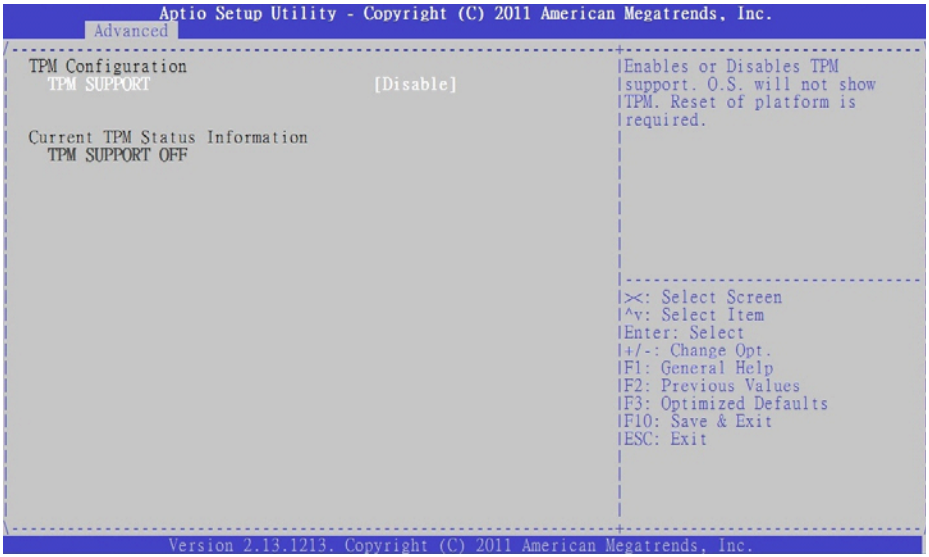

Lock Legacy Resources

Enable or disable Lock of Legacy Resources.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.3.2 Trusted Computing

Trusted computing is an industry standard to make personal computers more secure through a dedicated hardware chip, called a Trusted Platform Module (TPM).

TPM Support

This option enables or disables the TPM support. System reset is required. Options: Enabled/Disabled.

TPM State

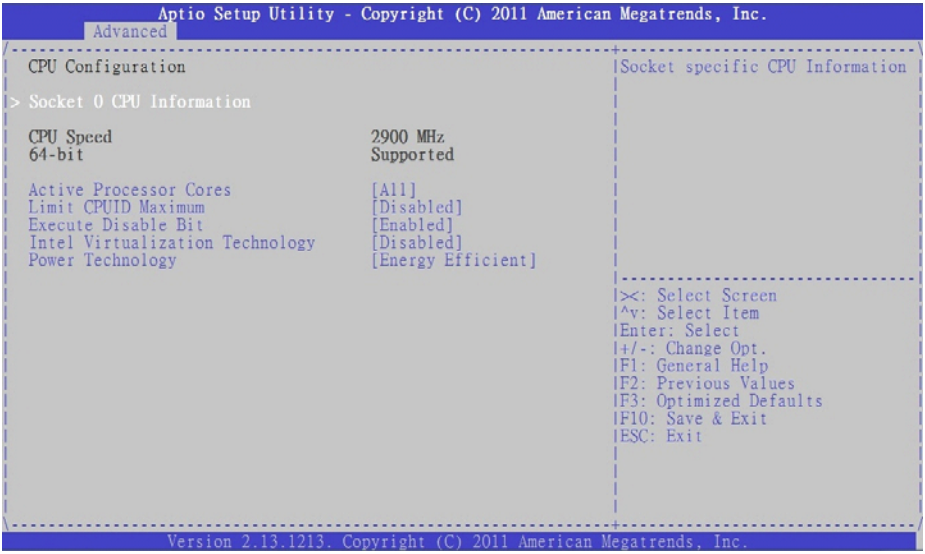

Determine whether TPM state change requires Password Authentication. Options: Enabled/Disabled.

Pending TPM Operation

Scheduled TPM operation. The settings for this value are Enable, Disable and Clear.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.3.3 CPU Configuration

Active Processor Cores

Number of cores to enable in processor. Options: All, 1, 2.

Limit CPUID Value Maximum

When Enabled, the processor will limit the maximum CPUID input value to 03h when queried, even if the processor supports a higher CPUID input value. When Disabled, the processor will return the actual maximum CPUID input value of the processor when queried. Enable this option to allow compatibility with older operating systems.

Execute Disable Bit

Allows you to enable or disable the No-Execution Page Protection Technology. Setting this item to [Disabled] forces the XD feature flag to always return a zero (0). Options: Enabled, Disabled.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

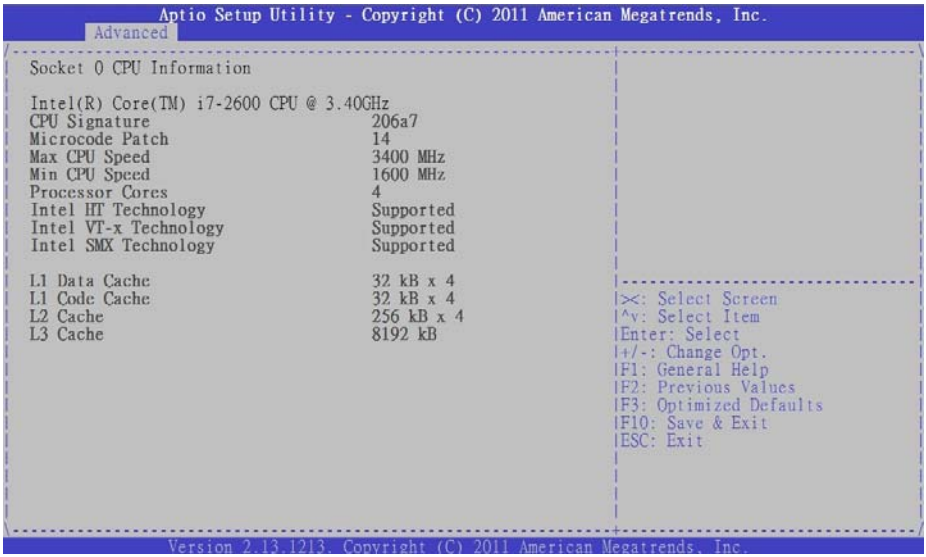

Intel® Virtualization Tech

When enabled, Intel® Virtualization Technology (Intel® VT) makes a single system appear as multiple independent systems to software. This allows for multiple, independent operating systems to be running simultaneously on a single system.

Power Technology

Sets the power management features. Options: Disable, Energy Efficient, Custom.

Socket 0 CPU Information

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.3.4 SATA Configuration

SATA Mode

Options: IDE, RAID, AHCI.

Serial ATA Controller 0/1

Appears when SATA mode is set to IDE. This item specifies whether Serial ATA Controller 0/1 is initialized in Compatible or Enhanced mode of operation. The settings are Disabled, Compatible and Enhanced.

Aggressive Link Power Management

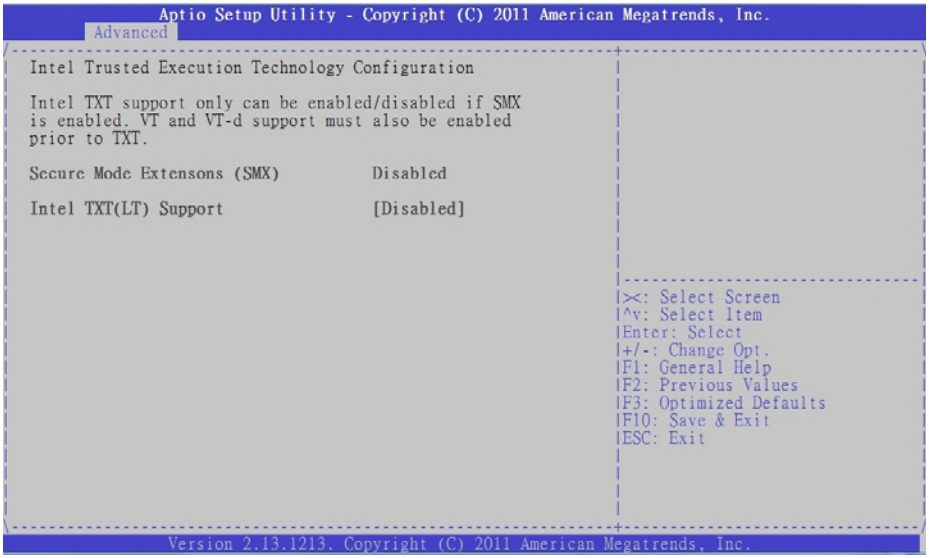

Appears when SATA mode is set to AHCI. The settings are Disabled and Enabled.

SATA Port 0~5

The **Staggered Spin-up**, **External SATA Port (eSATA)** and **Hot Plug** options appear when SATA Mode is set to AHCI. Options: Enabled/Disabled.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

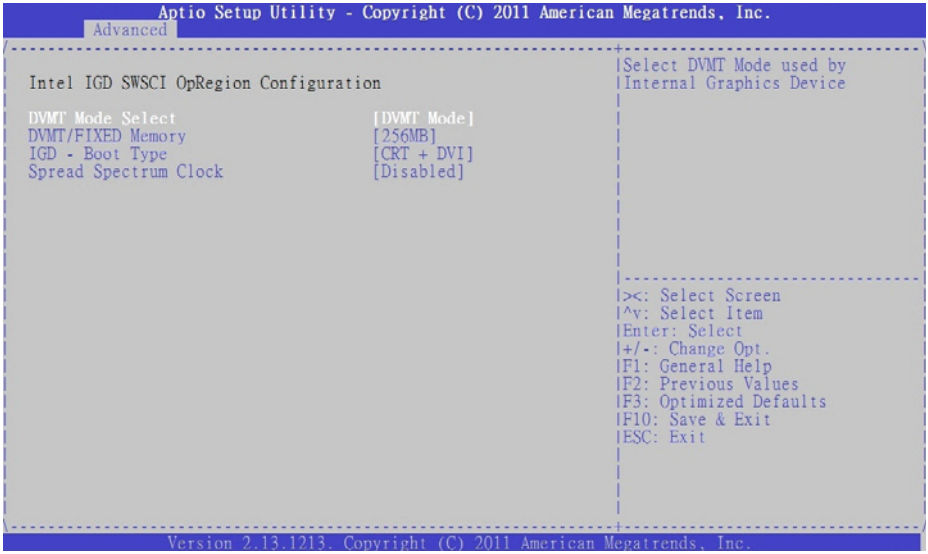

5.3.5 Intel TXT Configuration

Intel Trusted Execution Technology (Intel TXT) support can only be enabled when TPM is enabled, if the CPU supports Safer Mode Extensions (SMX), and Intel® Virtualization Technology (Intel® VT) and Intel® Virtualization Technology for Directed I/O (VT-d) are enabled.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.3.6 Intel IGD SWSCI OpRegion

DVMT Mode

This item allows the user to enable or disable the DVMT function.

DVMT/Fixed Memory

Select DVMT/Fixed memory size used by the Integrated Graphics Device. Options: 128MB, 256MB, Maximum.

IGD - Boot Type

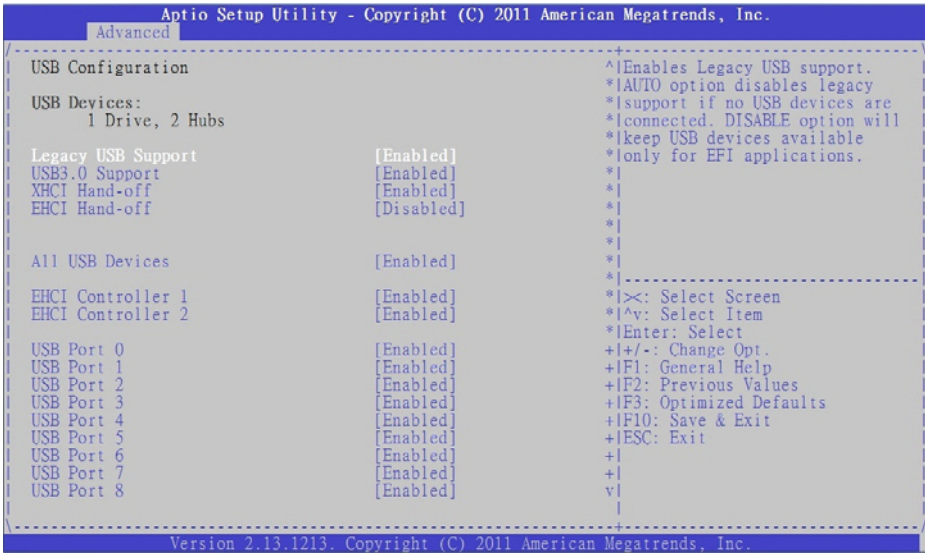

Select the video device which will be activated during POST. This has no effect if an external graphics device is present. Options: CRT+DVI, CRT, DVI.

Spread Spectrum Clock

IGD device spread spectrum clock function. Options: Enabled/ Disabled.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.3.7 USB Configuration

Legacy USB Support

Legacy USB Support refers to USB mouse and keyboard support. Normally if this option is not enabled, any attached USB mouse or USB keyboard will not become available until a USB compatible operating system is fully booted with all USB drivers loaded. When this option is enabled, any attached USB mouse or USB keyboard can control the system even when there are no USB drivers loaded on the system. Set this value to enable or disable the Legacy USB Support.

- **Disabled:** Set this value to prevent the use of any USB device in DOS or during system boot.
- **Enabled:** Set this value to allow the use of USB devices during boot and while using DOS.
- **Auto:** This option auto detects USB Keyboards or Mice and if found, allows them to be utilized during boot and while using DOS.

USB 3.0 Support

USB 3.0 Controller support. Options: Enable, Disable.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

XHCI Hand-Off

This is a workaround for OSes without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver. Options: Enable, Disable.

EHCI Hand-Off

This is a workaround for OSes without EHCI hand-off support. The EHCI ownership change should be claimed by EHCI driver. Options: Enable, Disable.

All USB Devices

Enabled/Disabled All USB devices. Options: Enable, Disable.

EHCI Controller 1/2

Enabled/Disabled USB 2.0 (EHCI) Support. Options: Enable, Disable.

USB Port 0~13

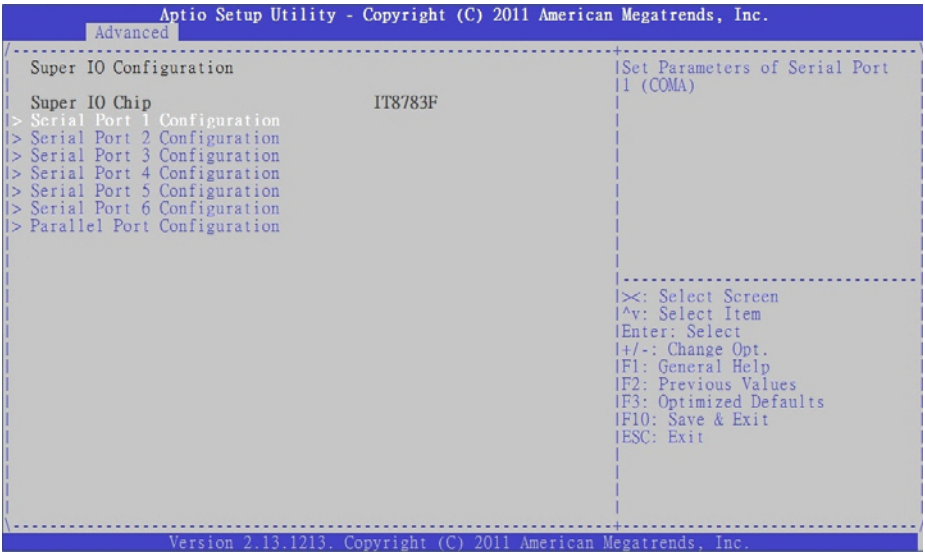

Enabled/Disabled USB Port 0~13. Options: Enable, Disable.

Mass Storage Devices:

Mass storage device emulation type. 'AUTO' enumerates devices according to their media format. Optical drives are emulated as 'CDROM', drives with no media will be emulated according to a drive type. Options: Auto, Floppy, Forced FDD, Hard Disk, CD-ROM.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.3.8 Super IO Configuration

Serial Port1-6 Configuration

Enter the submenu for each serial port to enable/disable and view the I/O port and IRQ settings.

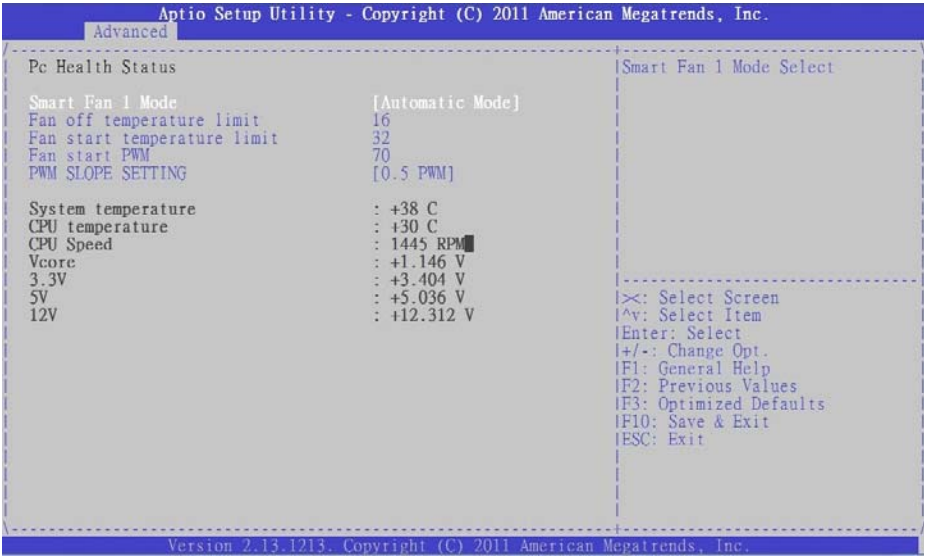

Parallel Port Configuration

Enter the submenu to enable/disable the parallel port and specify the base I/O port address.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.3.9 Hardware Monitor

You can use this screen to view System Status information and to select options for FAN1 settings (FAN2 is set to *Full On* by default).

Smart Fan 1 Mode Setting

Three operating modes are provided for FAN1: **Full Mode**, **Automatic Mode**, and **Manual Mode**. Full Mode runs the fan at full speed. Automatic Mode is *Smart Fan* mode. Manual Mode runs the fan at the set speed (minimum is 0, maximum is 127).

Automatic Mode

In Automatic Mode, the following settings are visible.

Fan Off Temperature Limit

Sets the temperature below which the fan will turn off in degrees Celsius (°C). When the temperature is higher than the set value, FAN1 will run at Fan Start PWM speed. When the temperature is lower than the set value, FAN1 will stop.

Fan Start Temperature Limit

When the temperature in degrees (°C) is higher than the set value, FAN1 will increase its speed according to the PWM Slope Setting value.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

Fan Start PWM

Sets the PWM value of the fan between **Fan Off Temperature Limit** and **Fan Start Temperature Limit**. Minimum value is 0 and maximum is 127.

PWMSlope Setting

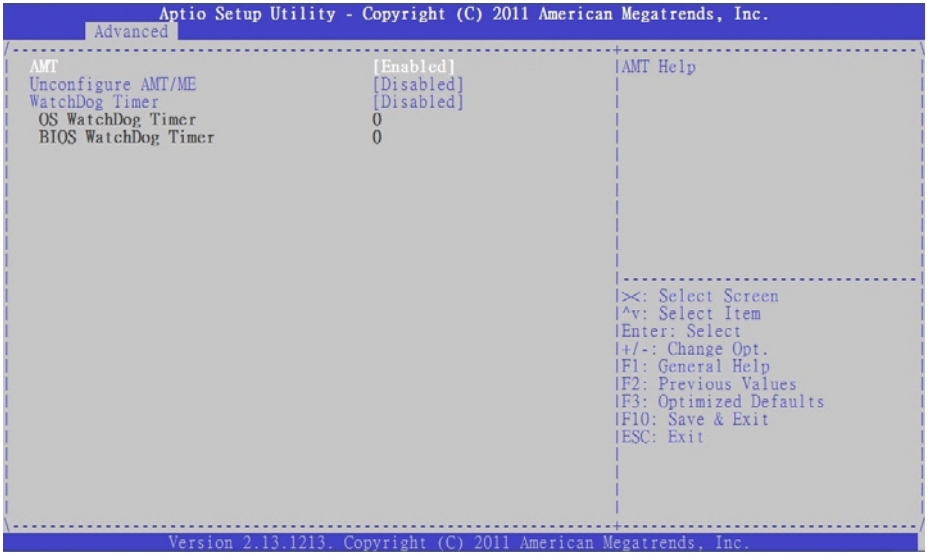

The Slope PWM Value sets the rate of increase the fan speed when the temperature is above **Fan Start Temperature Limit**.

System Status

System temperature, CPU temperature and fan speed (FAN1), system voltages.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.3.10 AMT Configuration

AMT

This item allows the user to Enable/Disable the Intel AMT function.

Unconfigure AMT/ME

This item allows the user to unprovision the AMT/ME function without a password.

WatchDog Timer

Options: Enabled/Disabled.

OS WatchDog Timer

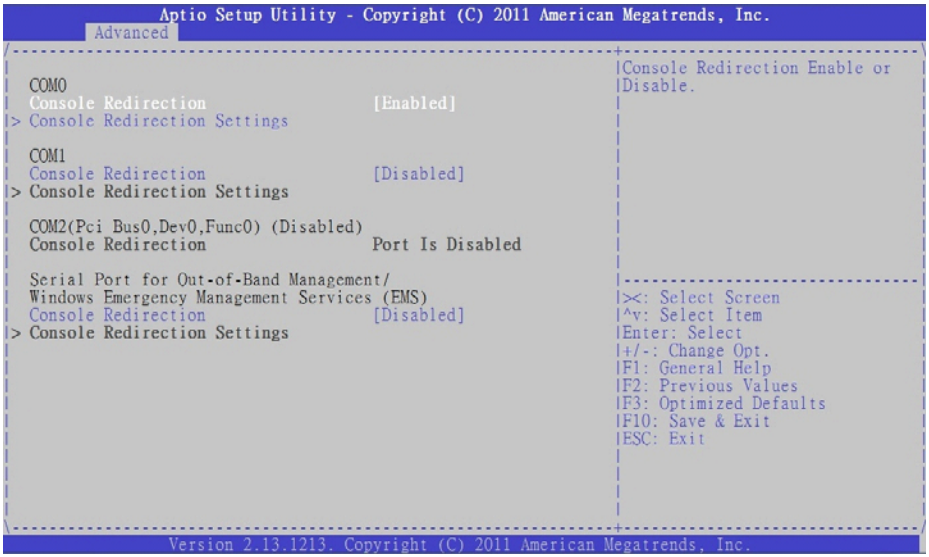

Sets the OS WatchDog Timer (seconds).

BIOS WatchDog Timer

Sets the BIOS WatchDog Timer (seconds).

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.3.11 Serial Port Console Redirection

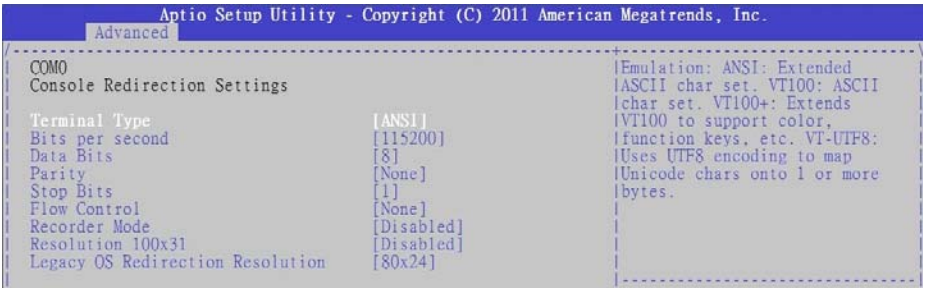

COM0/1 Console Redirection

Options: Enabled/Disabled.

Console Redirection Settings

The settings specify how the host computer and the remote computer exchange data. Both computers should have the same or compatible settings.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

Terminal Type

This option is used to select either VT100/VT-UTF8 or ANSI terminal type. Options: VT100, VT100+, VT-UTF8, ANSI.

Bits per second

Select the bits per second you want the serial port to use for console redirection. The options are 115200, 57600, 38400, 19200, 9600.

Data Bits

Select the data bits you want the serial port to use for console redirection. Set this value to 7 and 8.

Parity

Set this option to select Parity for console redirection. The settings for this value are None, Even, Odd, Mark and Space.

Stop Bits

Stop bits indicate the end of a serial data packet. (A start bit indicates the beginning). The standard setting is 1 stop bit. Communication with slow devices may require more than 1 stop bit. Set this value to 1 and 2.

Flow Control

Set this option to select Flow Control for console redirection. The settings for this value are None, Hardware RTS/CTS.

Record Mode

With this mode enabled only text will be sent., allowing capture of Terminal data. Set this value to Enabled or Disabled.

Resolution 100x31

Enable or disable extended terminal resolution. Set this value to Enabled or Disabled.

Legacy OS Redirection Resolution

On a legacy OS, the number of Rows and Columns supported by redirection. Set this value to 80x24 and 80x25.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

Serial Port for Out-of-Band Management

These settings control the ACPI serial port redirection table (SPCR) which is used by Windows servers to provide Windows Emergency Management Services (EMS) and is independent from console redirection output. OoB Management or EMS allows the remote management of selected components of Windows servers, even when a server is not connected to the network or the network is not available

Terminal Type

VT-UTF8 is the preferred terminal type for out-of-band management. The next best choice is VT100+ and then VT100. See above, in Console Redirection Settings page, for more Help with Terminal Type/Emulation. Options: **VT100, VT100+, VT-UTF8, ASNI.**

Bits per second

Select the bits per second you want the serial port to use for console redirection. The options are 115200, 57600, 38400, 19200, 9600.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

Flow Control

Set this option to select Flow Control for console redirection. The settings for this value are None, Hardware RTS/CTS.

Data Bits

Displays the frame width for Out-of-Band Management.

Parity

Displays the parity for Out-of-Band Management.

Stop Bits

Displays the number of stop bits for Out-of-Band Management.

5.4 Chipset Setup

Select the Chipset tab from the setup screen to enter the Chipset BIOS Setup screen. You can select any of the items in the left frame of the screen to go to the sub menu for that item. The Chipset BIOS Setup screen is shown below.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.4.1 Graphics and Memory Bridge Configuration

VT-d

Intel Virtualization Technology for Directed I/O. Options: Enabled/ Disabled.

Initial Graphics Adapter

Allows you to select which graphics controller to use as the primary boot device. Options: IGD, PCI/IGD, PCI/PEG, PEG/IGD, PEG/PCI.

IGD Memory

IGD shared memory size, Options: Disable/32M/64M/128M.

IGD Multi-Monitor

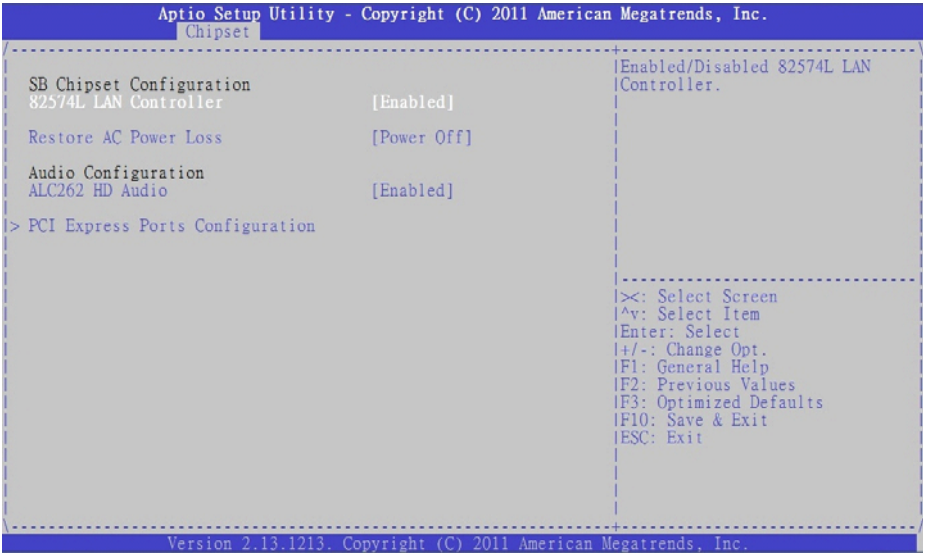

Multi-monitor support by the Internal Graphics Device. Options: Enabled/Disabled

PCI Express Port

This option enables auto negotiation with a PEG device, disables the use of the PEG port, or select enables use of the PEG port

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.4.2 PCH Bridge Configuration

82574L LAN Controller

Controls the onboard Intel 82574L LAN controller. Options: Enabled/Disabled.

Restore on AC Power Loss

Determines which state the computer enters when AC power is restored after a power loss. The options for this value are Last State, Power On and Power Off.

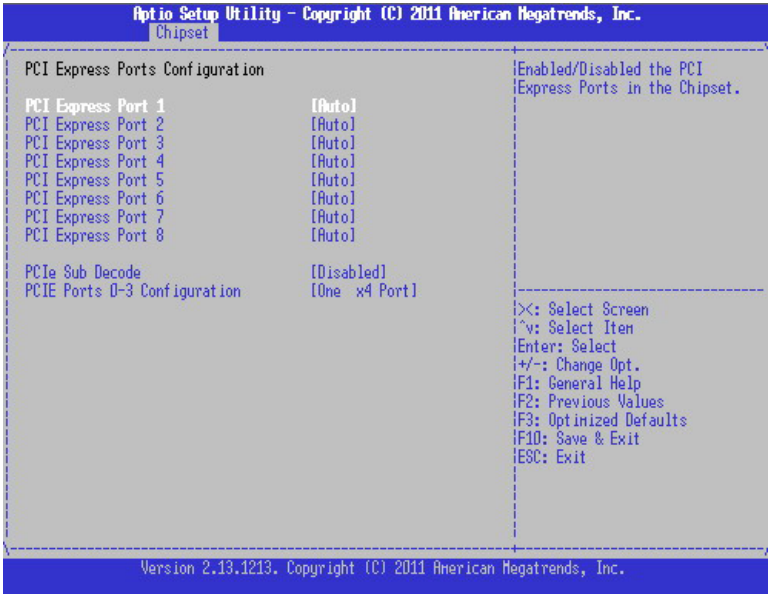

- **Power Off:** Set this value to always power off the system while AC power is restored.
- **Power On:** Set this value to always power on the system while AC power is restored.
- **Last State:** Set this value to power off/on the system depending on the last system power state while AC power is restored.

ALC626 HD Audio

Set this value to Enable/Disable the HD Audio Controller.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

PCI Express Port Configuration

PCI Express Port 1~8

Configures the PCI Express ports in of the chipset. Options: Auto, Enable, Disable.

PCIe Sub Decode

Enable or disable the PCIe Sub Decode port. This option is available when the Subtractive Decode Agent is enable (PCHTrap9[14]) = '1b'.

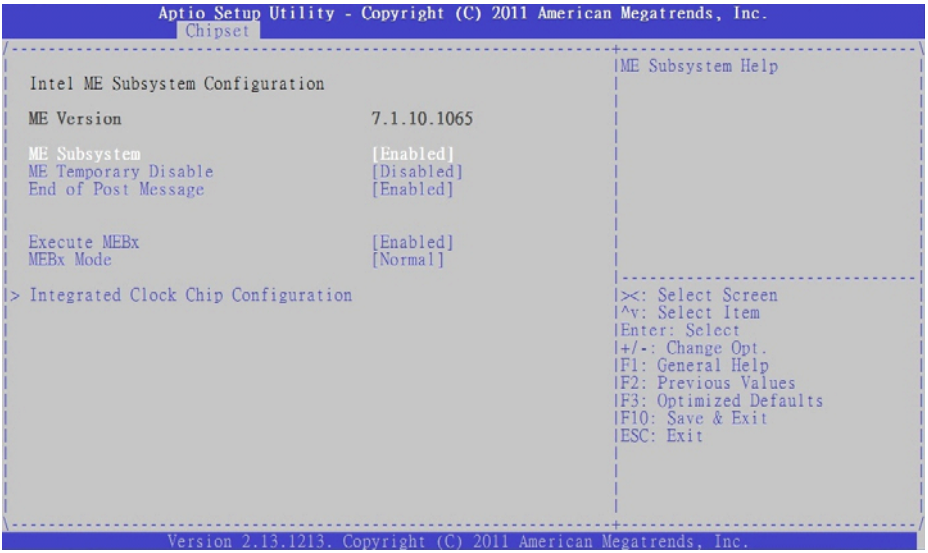

PCIE Ports 0-3 Configuration

Use this option to configure PCIe ports 0-3 of the PCH to "One x4 Port" or "Four x1 Ports".

NOTE: The *PCIE Ports 0-3 Configuration* option is available in BIOS version A1.6 and later.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.4.3 Management Engine Subsystem

ME Subsystem

Options: Enabled/Disabled.

ME Temporary Disable

Options: Enabled/Disabled (reset required).

End of POST Message

Options: Enabled/Disabled.

Execute MEBx

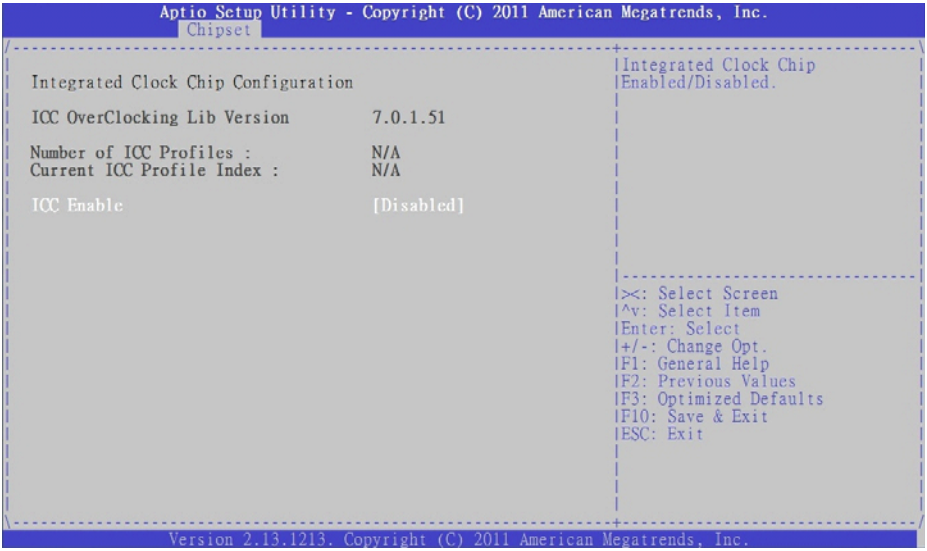

Options: Enabled/Disabled.

MEBx Mode

Options: Normal, Hidden Ctrl+P, Enter MEBx setup.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

Integrated Clock Chip Configuration

ICC Enable

Integrated Clock Chip. Options: Enabled/Disabled.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.5 Boot Configuration

Select the Boot tab from the setup screen to enter the Boot BIOS Setup screen. You can select any of the items in the left frame of the screen, such as Boot Device Priority, to go to the sub menu for that item. You can display a Boot BIOS setup option by highlighting it using the < Arrow > keys. The Boot Configuration screen is shown below:

Setup Prompt Timeout

Number of seconds to wait for setup activation. 65535 (0xFFFF) means wait indefinitely.

Bootup NumLock State

This setting determines the state of the NumLock function on bootup. Options: On, Off.

Quiet Boot

When this feature is enabled, the BIOS will display the full-screen logo during the boot-up sequence, hiding normal POST messages.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

When it is disabled, the BIOS will display the normal POST messages, instead of the full-screen logo.

Gate A20 Active

Options: Upon Request, Always.

Boot Option Priorities

Set the boot device options to determine the sequence in which the computer checks which device to boot from.

Hard Drive BBS Priorities

The Boot devices are listed in groups by device type. First press <Enter> to enter the sub-menu. You may then use the arrow keys to select the desired device, then press <+>, <-> or <PageUp>, <PageDown> key to move it up/down in the priority list. For example, USB storage disks will be listed as "USB Drives" in the sub-menu. Only the first device in each device gr

Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.6 Security Setup

Password Support

Two Levels of Password Protection

Provides both a Supervisor and a User password. If you use both passwords, the Supervisor password must be set first.

The system can be configured so that all users must enter a password every time the system boots or when Setup is executed, using either or either the Supervisor password or User password.

The Supervisor and User passwords activate two different levels of password security. If you select password support, you are prompted for a one to six character password. Type the password on the keyboard. The password does not appear on the screen when typed. Make sure you write it down. If you forget it, you must drain NVRAM and re-configure.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

Remember the Password

Keep a record of the new password when the password is changed. If you forget the password, you must erase the system configuration information in NVRAM.

To access the sub menu for the following items, select the item and press < Enter >:

- Change Administrator Password
- Change User Password
- Clear User Password

Administrator Password

Indicates whether a Administrator password has been set.

User Password

Indicates whether a user password has been set.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

5.7 Exit Menu

Select the Exit tab from the setup screen to enter the Exit BIOS Setup screen. You can display an Exit BIOS Setup option by high-lighting it using the < Arrow > keys. The Exit BIOS Setup screen is shown below.

Save Changes and Exit

When you have completed the system configuration changes, select this option to leave Setup and reboot the computer so the new system configuration parameters can take effect.

Save Configuration Changes and Exit Now?

[Ok] [Cancel]

appears in the window. Select Ok to save changes and exit.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

Discard Changes and Exit

Select this option to quit Setup without making any permanent changes to the system configuration.

Discard Changes and Exit Setup Now?

[Ok] [Cancel]

appears in the window. Select Ok to discard changes and exit.

Save Changes and Reset

Reset the system after saving the changes.

Discard Changes and Reset

Reset system setup without saving any changes.

Save Changes

Save changes made so far to any of the setup options.

Discard Changes

Select Discard Changes from the Exit menu and press < Enter >. Select OK to discard changes.

Restore Defaults

Restore/Load Default values for all the setup options.

Save as User Defaults

Save the changes made so far as User Defaults.

Restore User Defaults

Restore the User Defaults to all the setup options.

Boot Override

This group of functions includes a list of devices within the boot order. Select a drive to immediately boot that device regardless of the current boot order. If you are booting to the EFI Shell, an exit from the shell returns to Setup.

Important Safety Instructions

For user safety, please read and follow all **instructions**, **WARNINGS**, **CAUTIONS,** and **NOTES** marked in this manual and on the associated equipment before handling/operating the equipment.

- Read these safety instructions carefully.
- Keep this user's manual for future reference.
- Read the specifications section of this manual for detailed information on the operating environment of this equipment.
- When installing/mounting or uninstalling/removing equipment:
  - Turn off power and unplug any power cords/cables.
- To avoid electrical shock and/or damage to equipment:
  - Keep equipment away from water or liquid sources;
  - Keep equipment away from high heat or high humidity;
  - Keep equipment properly ventilated (do not block or cover ventilation openings);
  - Make sure to use recommended voltage and power source settings;
  - Always install and operate equipment near an easily accessible electrical socket-outlet;
  - Secure the power cord (do not place any object on/over the power cord);
  - Only install/attach and operate equipment on stable surfaces and/or recommended mountings; and,
  - If the equipment will not be used for long periods of time, turn off and unplug the equipment from its power source.

LRI Distribuída no Brasil pela LRI | vendas@lri.com.br | 51 2129-3000

- Never attempt to fix the equipment. Equipment should only be serviced by qualified personnel.

A Lithium-type battery may be provided for uninterrupted, backup or emergency power.

Risk of explosion if battery is replaced with one of an incorrect type. Dispose of used batteries appropriately.

- Equipment must be serviced by authorized technicians when:
  - The power cord or plug is damaged;
  - Liquid has penetrated the equipment;
  - It has been exposed to high humidity/moisture;
  - It is not functioning or does not function according to the user's manual;
  - It has been dropped and/or damaged; and/or,
  - It has an obvious sign of breakage.
