GLOBAL AI BUSINESS VALUE TO REACH IN 2022 3.9 TRILLION

AI in the healthcare market is expected to reach **USD 45.2 billion by 2026.**

AI in the automotive and transportation industry is projected to reach **USD 69.1 billion by 2029.**

AI in the supply chain sector is estimated to reach **USD 21.8 billion by 2027.**

AI in the manufacturing market is likely to reach **USD 16.7 billion by 2026.**

NVIDIA Turing™ Architecture Empowers Edge AI

Edge AI obtains data, processes data, and offers insights, with videos and images accounting for the major data source.

3072 CUDA Cores for 9.4 TFLOPS of FP32 performance.

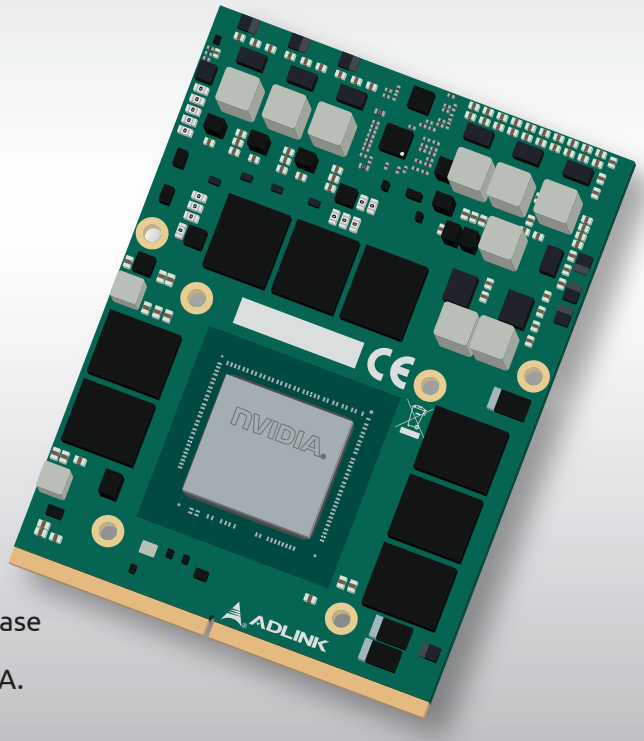

384 Tensor Cores for 75.2 TFLOPS of FP32 performance.

50% improvement in delivered performance per CUDA.

4X performance improvement of FP32 performance.*

448 GB per second memory bandwidth.

80% throughput increase with NVIDIA® GPUDirect® RDMA.

SWaP-Optimized Embedded MXM GPU Modules for Edge

1/5 the size of full-height full-length PEG cards.

3x lifecycle of non-embedded graphics.

50+ watt module power consumption.

*The Software and workloads used in performance tests may have been optimized for performance only on ADLINK platforms. Performance tests are measured using specific computer systems, components, software, operations, and functions. Any change to any of those factors may cause the results to vary. Contact ADLINK for more complete information about performance and benchmark results.
